

Position Paper

Background

The European Commission has published their proposal for a regulation that covers many aspects of AI (Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL LAYING DOWN HARMONISED RULES ON ARTIFICIAL INTELLIGENCE (ARTIFICIAL INTELLIGENCE ACT) AND AMENDING CERTAIN UNION LEGISLATIVE ACTS COM/2021/206 final) in April 2021. The draft Artificial Intelligence Act (AIA) is a horizontal regulation implementing a risk-based approach to identify the level of control on AI Systems being placed on the European market. The members of the Team NB, the EU association for Notified Bodies for medical devices and IVDs publish this position-paper with the intention to express their opinion and concerns regarding the upcoming regulations, with a focus on the interface and overlap between the upcoming regulations and the Medical Device Regulation (MDR) and IVD Regulation (IVDR).

Definitions

Article 3(1): ‘artificial intelligence system’ (AI system) means software that is developed with one or more of the techniques and approaches listed in Annex I and can, for a given set of human-defined objectives, generate outputs such as content, predictions, recommendations, or decisions influencing the environments they interact with

Annex I:

- (a) Machine learning approaches, including supervised, unsupervised and reinforcement learning, using a wide variety of methods including deep learning;
- (b) Logic- and knowledge-based approaches, including knowledge representation, inductive (logic) programming, knowledge bases, inference and deductive engines, (symbolic) reasoning and expert systems;
- (c) Statistical approaches, Bayesian estimation, search and optimization methods.

Team NB Opinion:

The definition used includes terms related to logic and knowledge-based systems. This is an overly broad definition such that it could potentially include non-AI systems leading to confusion for the regulators, manufacturers and notified bodies. Since the goal of standardization is to provide harmonized definitions of technologies for the purpose of exchanges between relevant stakeholders, we recommend to use the definition found in the international standard “ISO/IEC 2382:2015, Information technology – Vocabulary”.

Helping Students Learn in a Learner-Centered Environment Terry Doyle,2023-07-03 Before entering higher education most students learning experiences have been traditional and teacher centered Their teachers have typically controlled their learning with students having had little say about what and how to learn For many students encountering a learner centered environment will be new possibly unsettling and may even engender resistance and hostility Taking as his starting point students attitudes toward and unfamiliarity with learner centered classrooms Terry Doyle explains that motivating students to engage with this practice first of all requires explaining its underlying rationale and then providing guidance on how to learn in this environment This book is about how to help students acquire the new skills and knowledge they need to take on

unfamiliar roles and responsibilities It is informed by the author s extensive experience in managing learner centered classes and by his consultation work with faculty The first four chapters focus on the importance of imparting to students the evidence and underlying philosophy that is driving higher education to move from a teacher centered to a learner centered practice and what this means for students in terms of having control over and making important choices about their learning The final eight chapters focus on how to impart the skills that students need to learn or hone if they are to be effective learners in an environment that is new to them The book covers such practices as learning on one s own creating meaningful learning when collaborating with others peer teaching making presentations developing life long learning skills self and peer evaluation and give meaningful feedback This book provides a rich and informative answer to the fundamental question how do I help my students adjust to a learner centered practice
