Example question: "Technology has made us lazy". Do you agree with the statement given above?

SAMPLE OF A FULL ESSAY

Technology has made us lazy

Mostly anything created around us revolved in a spectacular scale until sometimes we can get too overwhelmed with what technology has brought upon us. Advanced technology (the application of scientific knowledge for practical purposes) has helped us in our daily life routines and it has also become a backbone in building our current society. Ideally, we are depending on technology and its benefits towards our lives. However, I disagree with the statement because technology has never made us lazy society. In fact, we use things related to technology to achieve our goals in life, to live in better surroundings and in addition, harmful diseases could be treated by medical technology invented by talented people.

It cannot be denied that technology helps most of us to achieve our dreams in life. Back in 1990's, we were happy to be able to use public phones to contact other people or enjoy watching evening drama series through television. As the technology has advanced, our young generations nowadays are lucky enough to enjoy their life just by having smart devices like smart phones, tablets or video game consoles. As a matter of fact, younger generations are not lazy because the world is actually in their hand; by one click at a time. Subsequently, technology eases our way to access to different channels that could help us to strive for the best. Photocopier machines, fax machines, printers and scanners are some of good inventions to help us in thriving in different walks of life. A group of students, workers or even housewives are fully utilizing different kinds of technologies to accomplish their dreams in life. They could be living their dreams either by working with big companies or using social sites to sell stuff online. Moreover, now that we have "WiFi" connection or "data roaming" to ease our jobs, sending emails, presenting reports or having a workshop online could be done easily by the help of technology. By far, technologies in communication has made us eager to be a part of our society. If humans are lazy, then those inventions of technology would not have been invented at the first place. Therefore, technology provides better things in life for us to achieve our goals in life.
