Pelli Clarke Pelli Architects Michael C. Crosbie, 2013-10-25 Pelli Clarke Pelli founded in 1977 by Cesar Pelli is an architectural office of worldwide renown They are known in particular for their elegant and technically advanced tower designs These are usually characterized by taut seamless envelopes without exposed profiles their visual structure is achieved by subtly staggered forms or variations in the color or materiality of the fa ade glazing The unusual offi ce structure of Pelli Clarke Pelli informs the work an almost craft like perception of architectural design and a close personal relation with the client are typical for their approach A model making workshop within the offi ce helps to fi nd the appropriate form Many projects also fulfi l urbanistic roles They create urban spaces or act as iconic landmarks within the city fabric The publication encompasses a selection of works from the past eight years Amongst the documented projects are Bloomberg Tower in New York Minneapolis Central Library Transbay Transit Center in San Francisco National Museum of Art in Osaka Xiao Bai Lo Tower in Tianjin and Torre Cajasol in Sevilla

The Strip Stefan Al, 2017-03-03 The transformations of the Strip from the fake Wild West to neon signs twenty stories high to starchitecture and how they mirror America itself The Las Vegas Strip has impersonated the Wild West with saloon doors and wagon wheels it has decked itself out in midcentury modern sleekness It has illuminated itself with twenty story high neon signs then junked them After that came Disney like theme parks featuring castles and pirates followed by replicas of Venetian canals New York skyscrapers and the Eiffel Tower It might be noted that forty two million people visited Las Vegas in 2015 ten million more than visited the real Paris More recently the Strip decided to get classy with casinos designed by famous architects and zillion dollar collections of art Las Vegas became the implosion capital of the world as developers driven by competition got rid of the old

to make way for the new offering a non metaphorical definition of creative destruction In *The Strip* Stefan Al examines the many transformations of the Las Vegas Strip arguing that they mirror transformations in America itself The Strip is not as popularly supposed a display of architectural freaks but representative of architectural trends and a record of social cultural and economic change Al tells two parallel stories He describes the feverish competition of Las Vegas developers to build the snazziest most tourist grabbing casinos and resorts with a cast of characters including the mobster Bugsy Siegel the eccentric billionaire Howard Hughes and the would be political kingmaker Sheldon Adelson And he views the Strip in a larger social context showing that it has not only reflected trends but also magnified them and sometimes even initiated them Generously illustrated with stunning color images throughout *The Strip* traces the many metamorphoses of a city that offers a vivid projection of the American dream Architectural Record, 2001 *Urban Play* Fabio Duarte, Ricardo Alvarez, 2021-08-03 Why technology is most transformative when it is playful and innovative spatial design happens only when designers are both tinkerers and dreamers In *Urban Play* Fabio Duarte and Ricardo Alvarez argue that the merely functional aspects of technology may undermine its transformative power Technology is powerful not when it becomes optimally functional but while it is still playful and open to experimentation It is through play in the sense of acting for one's own enjoyment rather than to achieve a goal that we explore new territories create new devices and languages and transform ourselves Only then can innovative spatial design create resonant spaces that go beyond functionalism to evoke an emotional response in those who use them The authors show how creativity emerges in moments of instability when a new technology overthrows an established one or when internal factors change a technology until it becomes a different technology Exploring the role of fantasy in design they examine Disney World and its outsized influence on design and on forms of social interaction beyond the entertainment world They also consider Las Vegas and Dubai desert cities that combine technology with fantasies of pleasure and wealth Video games and interactive media they show infuse the design process with interactivity and participatory dynamics leaving spaces open to variations depending on the users behavior Throughout they pinpoint the critical moments when technology plays a key role in reshaping how we design and experience spaces
