The Thesis Writing Journeys of Bachelor's and Master's Students Bojana Petrić, Montserrat Castelló, 2024-12-20

Completing a thesis is a crucial final stage in many bachelor's and master's programmes across Europe and beyond. However, the process of thesis writing, how it is experienced by the writers, and how those experiences impact on writing remain underexplored. This book examines the student experience of thesis writing through an interdisciplinary perspective, drawing on theories of learning, emotions, and genre, and narrative discursive analysis. As a result of this approach, the thesis is reconceptualised as a multilayered experience from the point of view of student writers. The chapters, which arose out of a collaborative research project across 10 European countries, employ an innovative combination of methods, including the use of journey plots, to provide a complex picture of the thesis writing process, which will be of interest to readers involved in academic writing at all levels. Kalman has been one of the most influential personalities in system and control theory. His ideas have been instrumental in a variety of areas. This is a Festschrift honoring his 60th birthday. It contains contributions from leading researchers in the field, giving an account of the profound influence of his ideas in a number of areas of active research in system and control theory. For example, since their introduction by Kalman in the early 60s, the concepts of controllability and observability of dynamical systems with inputs have been the corner stone of the great majority of investigations in the field.

ICEL 2017 - Proceedings of the 12th International Conference on e-Learning Laurie O. Campbell, Richard Hartshorn, 2017. **Resources in Education**, 1999-04. *The Teaching and Learning of Mathematics at University Level* Derek Holton, 2006-04-11. This book is the final report of the ICMI study on the Teaching and Learning of Mathematics at University Level. As such, it is one of a number of such studies that ICMI has commissioned. The other Study Volumes cover assessment in mathematics education, gender equity research in mathematics education, the teaching of geometry and history in mathematics education. All of these Study Volumes represent a statement of the state of the art in their respective areas. We hope that this is also the case for the current Study Volume. The current study on university level mathematics was commissioned for essentially four reasons. First, universities world-wide are accepting a much larger and more diverse group of students than has been the case. Consequently, universities have begun to adopt a role more like that of the school system and less like the elite institutions of the past. As a result, the educational and pedagogical issues facing universities have changed. Second, although university student numbers have increased significantly, there has not been a corresponding

increase in the number of mathematics majors Hence mathematics departments have to be more aware of their students needs in order to retain the students they have and to attract future students As part of this awareness departments of mathematics have to take the teaching and learning of mathematics more seriously than perhaps they have in the past

vorliegende Buch ist die erste zusammenfassende historische Gesamtdarstellung der Baustatik vom 16. Jahrhundert bis heute. In der Reihe edition Bautechnikgeschichte. Mit erstaunlicher Dynamik hat sich die Bautechnikgeschichte in den vergangenen Jahrzehnten zu einer höchst lebendigen, international vernetzten und viel beachteten eigenständigen Disziplin entwickelt. Auch wenn die nationalen Forschungszugänge unterschiedliche Akzente setzen, ist es doch das Bewusstsein, dass gerade die inhaltliche und methodische Vielfalt und das damit verbundene synthetische Potenzial die Stärke des neuen Forschungsfeldes ausmachen. Bautechnikgeschichte erschließt neue Formen des Verstehens von Bauen zwischen Ingenieurwesen und Architektur, zwischen Bau und Kunst, Technik und Wissenschaftsgeschichte. Mit der edition Bautechnikgeschichte erhält die neue Disziplin erstmals einen Ort für die Publikation. **Bulletin** United States. Office of Education, 1946
