HAND-MICRO

CHRONOS CX 75

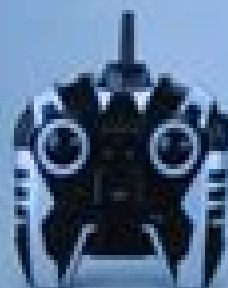

READY-TO-FLY

The incredible stability and undisturbable durability of the Arec™ (air-way) Chronos CX 75 makes it easy and fun for AIRCRAFT to fly an RC helicopter. The coaxial, counter-rotating blade design offers unsurpassed stability that will have you just hovering like a pro in no time while fully proportional controls deliver excellent maneuverability and precise control.

The Chronos CX 75's nano-micro size and low weight make it possible to fly indoors just about anytime and anywhere. The size is 100% factory-assembled and ready-to-fly right out of the box plus it really is durable - in fact, it's nearly undisturbable in most crashes! And unlike other similar size models, a full line of replacement parts is available in the case you do need them.

Also in the box is everything needed to fly including AA batteries for the 3-channel transmitter equipped with 2.4GHz technology digital trim and a built-in LiPo battery charger. And the included 100mAh 1S 3.7V LiPo battery delivers plenty of power and long flight times as well as the included pre-charge. That means there's nothing extra to buy and you can be ready to fly within minutes of opening the box.

So even if you've never flown an RC helicopter before, there's no better way to enjoy incredible power and maneuverability, precise handling and no motor noise than the Chronos CX 75!

The Chronos CX 75 is fully-assembled and ready-to-fly right out of the box including:

- 3-Channel 2.4GHz Transmitter
- Built-in LiPo Battery Charger
- All Batteries for the Transmitter

Ultra-Static Coaxial, Counter-Rotating Blade Design

Conventional helicopter main and tail rotor blade designs are inherently less stable and more difficult to fly. But the Chronos CX 75's unique counter-rotating blade design offers unsurpassed stability and precision while canceling out unwanted torque and using electromagnetic motor control for full control. The end result is an extremely smooth and easy to fly RC helicopter that all first-time pilots!
