Animal Alterity Science Fiction And The Question Of The Animal:

Animal Alterity Sherryl Vint, 2010-01-01 *Animal Alterity* uses readings of science fiction texts to explore how animals are central to our perception of humanity. Arguing that the academic field of animal studies and the popular genre of science fiction share a number of critical concerns, Sherryl Vint expresses an urgent need to reconsider the human-animal boundary in a world of genetic engineering, factory farming, species extinctions, and increasing evidence of animal intelligence, emotions, and tool use. Mapping the complex terrain of human relations with non-human animals, this book offers an important intervention into the contentious ongoing discussions of the post-human.

Animal Alterity Sherryl Vint, 2010-04-21 *Animal Alterity* uses readings of science fiction texts to explore the centrality of animals for our ways of thinking about human. It argues that the academic field of animal studies and the popular genre of science fiction share a number of critical concerns: thinking about otherness and the nature of human being, desiring communication across species difference, and interrogating the social and ethical consequences of changes in science and technology. We are living in a complex set of contradictory and conflicting relations with non-human animals. This book maps this complex terrain, arguing that we are better able to perceive options for a transformed politics if we perceive our various material relations with non-human animals within a deeper understanding of the functions of the category animal.

Animals and Science Fiction Nora Castle, Giulia Champion, 2024-03-22 *Animals and Science Fiction* is the first edited collection to be published focusing on the intersection of animal studies and science fiction studies. It offers a broad range of theoretical approaches and primary source texts, including novels, short stories, poetry, film, and TV, photography, erotica, video games, and urban planning documents that explore the ways works of science fiction can transform how we see and interact with nonhuman others. With an eye toward more just multispecies futures, it argues that speculative imaginaries can be pivotal in changing attitudes toward and understandings of nonhuman animals in our world today. Chapters appeal to those interested in biopolitics, posthumanism, new materialism, ecocriticism, and the environmental humanities, ocean humanities, postcolonial studies, critical race studies, Indigenous studies, global SF studies, film studies, and food studies. Taken together, the collection works to showcase a diverse and growing field of scholarly inquiry into animals and science fiction.

Animals in Detective Fiction Ruth Hawthorn, John Miller, 2022-12-06 This book explores the vast array of animals that populate detective fiction. If the genre begins, as is widely supposed, with Edgar Allan Poe's *Murders in the Rue Morgue* (1841), then detective fiction's very

first culprit is an animal. Animals moreover consistently appear as victims, clues and companions while the abstract conception of animality is closely tied to the idea of criminality. Although it is often described as an essentially conservative form, detective fiction can unsettle the binary of human and animal to intersect with developing concerns in animal studies: animal agency, the ethical complexities of human-animal interaction, the politics and literary aesthetics of violence and animal metaphor. Gathering its 14 essays into sections on ontologies, ethics, politics and forms, *Animals in Detective Fiction* provides a compelling and nuanced analysis of the central role creatures play in this enduringly popular and continually morphing literary form.

Literary Animal Studies and the Climate Crisis Sune Borkfelt, Matthias Stephan, 2022-11-22. *Literary Animal Studies and the Climate Crisis* connects insights from the field of literary animal studies with the urgent issues of climate change and environmental degradation and features considerations of new interventions by literature in relation to these pressing questions and debates. This volume informs academic debates in terms of how nonhuman animals figure in our cultural imagination of topics such as climate change, extinction, animal otherness, the posthuman and environmental crises. Using a diverse set of methodologies, each chapter presents relevant cases which discuss the various aspects of these interstices. This volume is an intersection between literary animal studies and climate fiction intended as an interdisciplinary intervention that speaks to the global climate debate and is thus relevant across the environmental humanities.

The Palgrave Handbook of Animals and Literature Susan McHugh, Robert McKay, John Miller, 2020-11-25. This volume is the first comprehensive guide to current research on animals, animality and human-animal relations in literature. To reflect the history of literary animal studies to date, its primary focus is literary prose and poetry in English, while also accommodating emergent discussions of the full range of media and contexts with which literary studies engages, especially film and critical theory. User-friendly language, references, even suggestions for further readings are included to help newcomers to the field understand how it has taken shape primarily through recent decades. To further aid teachers, sections are organized by conventions of periodization and chapters address a range of canonical and popular texts. Bookended by sections devoted to the field's conceptual foundations and new directions, the volume is designed to set an agenda for literary animal studies for decades to come.

Liverpool University Press Autumn 2010 Catalogue, **The New Routledge Companion to Science Fiction** Mark Bould, Andrew M. Butler, Sherryl Vint, 2024-06-13. *The New Routledge Companion to Science Fiction* provides an overview of the study of science fiction across multiple academic fields. It offers a new conceptualisation of the field today, marking the significant changes that have taken place in sf studies over the past 15 years. Building on the pioneering research in the first edition, the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print. It also updates and expands the range of frameworks that are relevant to the study of science fiction. The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context, including South Asian, Latin American, Chinese

and African diasporic science fiction The contributors use both well established critical and theoretical approaches and embrace a range of new ones including biopolitics climate crisis critical ethnic studies disability studies energy humanities game studies medical humanities new materialisms and sonic studies This book is an invaluable resource for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today Chapter 39 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Palgrave Handbook of Feminist, Queer and Trans* Narrative Studies Vera Nünning, Corinna Assmann, 2025-07-09 The Palgrave Handbook of Feminist Queer and Trans Narrative Studies provides a comprehensive overview of the intersection between narrative theory and feminist queer and trans theory Bringing together eminent and emerging scholars from a range of disciplines it foregrounds connections between new views on gender and recent developments in narratology The first section outlines key concepts for the study of narrative and gender and features theory oriented chapters on what it means for the study of narrative to go beyond gender binaries The middle sections cover some of the currently most influential fields of narratology and literary theory cognitive and eco narratology postcolonial studies as well as concepts that are central to both narrative and gender studies such as affect and performativity The last section explores the meaning of gender in various genres and media formats from science fiction and trans autobiographies to film TV and social media This field changing volume shows how the proliferation of new ways to think about gender identity and sexuality demands a strong reconsideration of narratological methodologies Chapter 23 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Animality and Children's Literature and Film A. Ratelle, 2014-11-27 Examining culturally significant works of children's culture through a posthumanist or animality studies lens *Animality and Children's Literature and Film* argues that Western philosophy's objective to establish a notion of an exclusively human subjectivity is continually countered in the very texts that ostensibly work to this end
