Handbook of Scientology James R. Lewis, 2017-01-05 The Handbook of Scientology brings together a collection of fresh studies of the most persistently controversial of all contemporary New Religions In recent years increasing scholarly attention has been directed at the Church of Scientology resulting in a small tsunami of new scholarship We have finally reached a point in time where a book on Scientology need not restrict itself to basics Thus for example the historical chapters in the present volume are not really aimed at providing elementary facts on Scientology's background but rather focus on understanding how the Church of Scientology developed over the years In short the Handbook of Scientology will provide a wealth of new information on a topic that one might otherwise have thought exhausted Contributors are Matthew Charet Dorthe Refslund Christensen Carole M Cusack Bernard Doherty Marco Frenschkowski Liselotte Frisk Kjersti Helles y Don Jolly James R Lewis Renee Lockwood Andr s M t T th G bor D niel Nagy Johanna Petsche Erin Prophet Susan Raine David G Robertson Mikael Rothstein Lisbeth Tuxin Rubin Nicole S Ruskell Shannon Trosper Schorey Michelle Swainson Inga B rdsen T llefsen Hugh G Urban Donald A Westbrook and Benjamin Zeller

Art and Idea in the Novels of China Miéville Carl Freedman, 2015-09-07 This book offers in the first six chapters critical readings of six novels by China Mi ville which are followed in the seventh chapter by a theoretical meditation on some of the conceptual issues raised by and engaged in the Mi ville oeuvre There comes a moment in *The City* the City though it is not necessarily the same moment for every reader when you realise that Beszel and Ul Qoma are not separate realms but the same space divided Likewise art and idea are often subject to absurd partition but then along comes an author such as China Mi ville who shows them to be in truth indissoluble So argues Freedman's inordinately readable and just as rigorous account of Mi ville's major novels Highly recommended Mark Bould University of the West of England Freedman offers a compelling interpretation of Mi ville's novels informed equally by an impressive range of literary influences and a carefully documented exploration of historical antecedents Seeing Mi ville's genre hybridity as an illustration of the power of dialectical thinking Freedman illuminates the complex utopian project of Mi ville's fiction Freedman is one of our finest critical voices on Mi ville one of the most important speculative writers of the 21st century Sherryl Vint University of California Riverside

historian Edward Long's *History of Jamaica* and Grenadian sci fi writer Tobias Buckell's *Xenowealth* series set in the future Caribbean. Fantastical representations of the region generally occupy one of two spaces. In the first the Caribbean fantastic facilitates an imagining of the colonial experience and its aftermath as one in which the region and its representatives exercise agency and in which the humanity of the region's inhabitants is asserted. Alternately the fantastic is sometimes situated as a signifier of the irrational and uncivilized. The thread that unites portrayals of the fantastic Caribbean in the latter kind of works is that they tend to locate Caribbean belief systems as powerful even at times inadvertently in contradiction to the text's ideological posture. Nevins shows how the singular Caribbean identity that emerges in these texts is at odds with the complex historical narratives of actual Caribbean countries and colonies.

The Oxford Handbook of Science Fiction Rob Latham, 2014. The Oxford Handbook of Science Fiction attempts to describe the historical and cultural contours of SF in the wake of technoculture studies. Rather than treating the genre as an isolated aesthetic formation it examines SF's many lines of cross-pollination with technocultural realities since its inception in the nineteenth century, showing how SF's unique history and subcultural identity has been constructed in ongoing dialogue with popular discourses of science and technology. The volume consists of four broadly themed sections, each divided into eleven chapters. Section I, *Science Fiction as Genre*, considers the internal history of SF literature, examining its characteristic aesthetic and ideological modalities, its animating social and commercial institutions, and its relationship to other fantastic genres. Section II, *Science Fiction as Medium*, presents a more diverse and ramified understanding of what constitutes the field as a mode of artistic and pop cultural expression, canvassing extra-literary manifestations of SF ranging from film and television to videogames and hypertext to music and theme parks. Section III, *Science Fiction as Culture*, examines the genre in relation to cultural issues and contexts that have influenced it and been influenced by it, in turn the goal being to see how SF has helped to constitute and define important sub-cultural groupings, social movements, and historical developments during the nineteenth, twentieth, and twenty-first centuries. Finally, Section IV, *Science Fiction as Worldview*, explores SF as a mode of thought and its intersection with other philosophies and large-scale perspectives on the world from the Enlightenment to the present day.
