Pedro Forte,Daniel Leite Portella,José Eduardo Teixeira,Diogo Monteiro,2025-01-06 In recent years there has been a growing
recognition of the profound interconnection between mental health cognition and physiological responses in the context of
physical activity exercise and sports This heightened awareness has prompted a paradigm shift towards embracing a holistic
psychophysiological perspective in research within this field Volume III of this Research Topic delves deeper into the
intricate relationship between psychological factors such as depression anxiety and motivation and their impact on
physiological variables during physical activity exercise and sports performance Through a comprehensive exploration of this
multidimensional interplay we aim to advance our understanding of how cognition education and psychological well being
intersect with physiological responses By examining the nexus of mental health cognition and physiological variables we aim
to shed light on the underlying mechanisms driving performance behaviour and overall well being in athletes and individuals
engaged in physical activity We invite contributors to uncover new insights and pave the way for innovative approaches to
enhancing performance promoting well being and addressing mental health challenges in the realm of physical activity
