Intelligent Software Defect Prediction Xiao-Yuan Jing,Haowen Chen,Baowen Xu,2024-01-17 With the increasing complexity of and dependency on software software products may suffer from low quality high prices be hard to maintain etc Software defects usually produce incorrect or unexpected results and behaviors Accordingly software defect prediction SDP is one of the most active research fields in software engineering and plays an important role in software quality assurance Based on the results of SDP analyses developers can subsequently conduct defect localization and repair on the basis of reasonable resource allocation which helps to reduce their maintenance costs This book offers a comprehensive picture of the current state of SDP research More specifically it introduces a range of machine learning based SDP approaches proposed for different scenarios i e WPDP CPDP and HDP In addition the book shares in depth insights into current SDP approaches performance and lessons learned for future SDP research efforts We believe thesetheoretical analyses and emerging challenges will be of considerable interest to all researchers graduate students and practitioners who want to gain deeper insights into and or find new research directions in SDP It offers a comprehensive introduction to the current state of SDP and detailed descriptions of representative SDP approaches *Computational Intelligence-based Time Series Analysis*

Dinesh C. S. Bisht,Mangey Ram,2022-11-30 The sequential analysis of data and information gathered from past to present is called time series analysis Time series data are of high dimension large size and updated continuously A time series depends on various factors like trend seasonality cycle and irregular data set and is basically a series of data points well organized in time Time series forecasting is a significant area of machine learning There are various prediction problems that are time dependent and these problems can be handled through time series analysis Computational intelligence CI is a developing computing approach for the forthcoming several years CI gives the liveness to model the problem according to given requirements It helps to find swift solutions to the problems arising in numerous disciplines These methods mimic human behavior The main objective of CI is to develop intelligent machines to provide solutions to real world problems which are not

modelled or are too difficult to model mathematically This book aims to cover the recent advances in time series and applications of CI for time series analysis *Machine Intelligence* Pethuru Raj,P Beaulah Soundarabai,Peter Augustine,2023-10-03 Machines are being systematically empowered to be interactive and intelligent in their operations offerings and outputs There are pioneering Artificial Intelligence AI technologies and tools Machine and Deep Learning ML DL algorithms along with their enabling frameworks libraries and specialized accelerators find particularly useful applications in computer and machine vision human machine interfaces HMIs and intelligent machines Machines that can see and perceive can bring forth deeper and decisive acceleration automation and augmentation capabilities to businesses as well as people in their everyday assignments Machine vision is becoming a reality because of advancements in the computer vision and device instrumentation spaces Machines are increasingly software defined That is vision enabling software and hardware modules are being embedded in new generation machines to be self surroundings and situation aware Machine Intelligence Computer Vision and Natural Language Processing emphasizes computer vision and natural language processing as drivers of advances in machine intelligence The book examines these technologies from the algorithmic level to the applications level It also examines the integrative technologies enabling intelligent applications in business and industry Features Motion images object detection over voice using deep learning algorithms Ubiquitous computing and augmented reality in HCI Learning and reasoning in Artificial Intelligence Economic sustainability mindfulness and diversity in the age of artificial intelligence and machine learning Streaming analytics for healthcare and retail domains Covering established and emerging technologies in machine vision the book focuses on recent and novel applications and discusses state of the art technologies and tools *CDS 12 Years Topic-wise Solved Papers Mathematics, English & General Knowledge (2007-2018) - 3rd Edition* Disha Experts,2018-06-01 The thoroughly revised updated 3rd edition of CDS 12 Years Mathematics English General Knowledge Topic wise Solved Papers 2007 Feb 2018 Feb consists of last 12 years both Feb and November papers from 2007 Paper 1 2018 Paper 1 solved papers of Elementary Mathematics English and General Knowledge distributed into 42 topics In all there are 23 Question papers from 2007 to 2018 I which have been divided into the above discussed 42 topics Practicing these questions aspirants will come to know about the pattern and toughness of the questions asked in the examination All the papers are divided into following sections Section I Mathematics which is distributed into 25 topics Section II English is divided into 8 topics Section III General Knowledge is divided into 9 topics The book contains 6460 MILESTONE MCQ s from the above 23 Question papers The strength of the book lies in the originality of its question papers and Errorless Solutions The solution of each and every question is provided in detail step by step so as to provide 100% concept clarity to the students **CDS 14 Years Mathematics, English & General Knowledge Topic-wise Solved Papers (2007 - 2020) - 4th Edition** Disha Experts,2020-06-20 **Pioneering Works on Distribution Theory** Nobuaki Hoshino,Shuhei Mano,Takaaki Shimura,2021-01-04 This book highlights the forefront of research on statistical distribution

theory with a focus on unconventional random quantities and on phenomena such as random partitioning. The respective papers reflect the continuing appeal of distribution theory and the lively interest in this classic field which owes much of its expansion since the 1960s to Professor Masaaki Sibuya to whom this book is dedicated. The topics addressed include a test procedure for discriminating the multivariate Ewens distribution from the Pitman Sampling Formula approximation to the length of the Ewens distribution by discrete distributions and the normal distribution and the distribution of the number of levels in s specified random permutations. Also included are distributions associated with orthogonal polynomials with a symmetric matrix argument and the characterization of the Jeffreys prior.

Predicting Flow-Induced Acoustics at Near-Stall Conditions in an Automotive Turbocharger Compressor Roberto Navarro García, 2018-01-10. This thesis offers new insights into the fluid flow behavior of automotive centrifugal compressors operating under near stall conditions. Firstly it discusses the validation of three dimensional computational fluid dynamics CFD unsteady simulations against acoustic experimental measurements using an original procedure based on plane wave pressure decomposition. It then examines the configuration of the CFD cases highlighting the key parameters needed for a successful calculation. Moreover it describes both the compressor mean and unsteady flow field from best efficiency to near surge operating points. Lastly it provides readers with explanations of the various phenomena that arise when the mass flow rate is reduced and the compressor is driven to poor and noisy performance. Written for students, researchers and professionals who want to improve their understanding of the complex fluid flow behavior in centrifugal compressors, the thesis offers valuable practical insights into reducing the acoustic emissions of turbochargers.

Proceedings of the 2nd International Conference on Business and Policy Studies Canh Thien Dang, Javier Cifuentes-Faura, Xiaolong Li, 2023-10-07. AI Techniques for Reliability Prediction for Electronic Components Bhargava, Cherry, 2019-12-06. In the industry of manufacturing and design, one major constraint has been enhancing operating performance using less time. As technology continues to advance, manufacturers are looking for better methods in predicting the condition and residual lifetime of electronic devices in order to save repair costs and their reputation. Intelligent systems are a solution for predicting the reliability of these components; however, there is a lack of research on the advancements of this smart technology within the manufacturing industry.

AI Techniques for Reliability Prediction for Electronic Components

provides emerging research exploring the theoretical and practical aspects of prediction methods using artificial intelligence and machine learning in the manufacturing field Featuring coverage on a broad range of topics such as data collection fault tolerance and health prognostics this book is ideally designed for reliability engineers electronic engineers researchers scientists students and faculty members seeking current research on the advancement of reliability analysis using AI
