Studies Janki Andharia, 2020-03-25 This book covers several dimensions of disaster studies as an emerging discipline. It is the inaugural book in the series Disaster Studies and Management and deals with questions such as: Is disaster management a field of practice, a profession, or simply a new area of study? Exploring intersectionalities, the book also examines areas of research that could help enhance the discourse on disaster management from policy and practice perspectives, revisiting conventional event-centric approaches which are the basis for most writings on the subject. Several case studies and comparative analyses reflect a critical reading of research and practice concerning disasters and their management. The book offers valuable insights into various subjects including the challenge of establishing inter- and multi-disciplinary teams within the academia involved in disaster studies and sociological and anthropological readings of post-disaster memoryscapes. Each of the contributors has an enduring interest in disaster studies, thus enriching the book immensely. This book will be of interest to all the students and scholars of disaster studies and disaster management as well as to practitioners and policymakers.

Handbook of Australian School Psychology Monica Thielking, Mark D. Terjesen, 2017-01-26 This handbook addresses the current state and practice of school psychology with a focus on standards unique to Australia, including historical, legal, ethical, practical, and training factors. It provides a compilation of the most current research-based practices as well as guidelines for evidence-based assessment and intervention for common conditions, e.g., autism, depression, learning disabilities, and for delivering appropriate services to targeted student populations, e.g., LGBT, gifted, medical issues. Chapters discuss the application of national and international school psychology practices within the Australian educational and psychological structure. The handbook also examines the lack of formal resources specific to Australia's culture and psychology systems with its unique mix of metropolitan cities and the vast geographic landscape that spans regional and remote areas. It offers numerous case studies and innovative school mental health programs as well as recommendations for professional development and advocacy that are unique to Australian school psychology. Topics featured in this Handbook include: Evidence-based assessment and intervention for dyscalculia and mathematical disabilities; Identification and management of adolescent risk-taking behaviors and addictions; Understanding and responding to crisis and trauma in the school setting; Prevention and intervention for bullying in schools; Class and school-wide approaches to addressing behavioral and academic needs; The role of school psychologists in the digital age; Practical advice for school psychologists facing complex ethical dilemmas. The Handbook of Australian School Psychology is a must-have resource for researchers, scientists, practitioners, and graduate students in child and school psychology, social work, and related fields that address mental health services for children and adolescents.
