Maratea, 2019-03-26 A history of the McCleskey v Kemp Supreme Court ruling that effectively condoned racism in capital cases In 1978 Warren McCleskey a black man killed a white police officer in Georgia He was convicted by a jury of 11 whites and 1 African American and was sentenced to death Although McCleskey's lawyers were able to prove that Georgia courts applied the death penalty to blacks who killed whites four times as often as when the victim was black the Supreme Court upheld the death sentence in McCleskey v Kemp thus institutionalizing the idea that racial bias was acceptable in the capital punishment system After a thirteen year legal journey McCleskey was executed in 1991 In *Killing with Prejudice* R J Maratea chronicles the entire litigation process which culminated in what has been called the Dred Scott decision of our time Ultimately the Supreme Court chose to overlook compelling empirical evidence that revealed the discriminatory manner in which the assailants of African Americans are systematically undercharged and the aggressors of white victims are far more likely to receive a death sentence He draws a clear line from the lynchings of the Jim Crow era to the contemporary acceptance of the death penalty and the problem of mass incarceration today The McCleskey decision underscores the racial socioeconomic and gender disparities in modern American capital punishment and the case is fundamental to understanding how the death penalty functions for the defendant victims and within the American justice system as a whole Wall Street Bank Involvement with Physical Commodities United States. Congress. Senate. Committee on Homeland Security and Governmental Affairs. Permanent Subcommittee on Investigations, 2014 After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a

nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today s reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state s once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools Congressional Record United States. Congress,1999 **Rubble Music** Abby Anderton,2019-07-23 As the seat of Hitler s government Berlin was the most frequently targeted city in Germany for Allied bombing campaigns during World War II Air raids shelled celebrated monuments left homes uninhabitable and reduced much of the city to nothing but rubble After the war s end this apocalyptic landscape captured the imagination of artists filmmakers and writers who used the ruins to engage with themes of alienation disillusionment and moral ambiguity In Rubble Music Abby Anderton explores the classical music culture of postwar Berlin analyzing archival documents period sources and musical scores to identify the sound of civilian suffering after urban catastrophe Anderton reveals how rubble functioned as a literal figurative psychological and sonic element by examining the resonances of trauma heard in the German musical repertoire after 1945 With detailed explorations of reconstituted orchestral ensembles opera companies and radio stations as well as analyses of performances and compositions that were beyond the reach of the Allied occupiers Anderton demonstrates how German musicians worked through cleared away or built over the debris and devastation of the war *Production Management and Business Development* Bohuslava Mihalčová,Petra Szaryszová,Lenka Štofová,Michal Pružinský,Barbora Gontkovičová,2018-12-07 Trends in economic development rely on increasing human knowledge which stimulate the development of new sophisticated technologies With their utilization production is raised and the intent is to decrease natural resources consumption and protect and save our life environment as much as we can At the same time increasing pressure is observed both from competition and customers The way to be competitive is by improving manufacturing and services offered to the customer These are the major challenges of contemporary enterprises Organizations are improving their activities and management processes This is necessary to manage the seemingly intensifying competitive markets successfully Enterprises apply business optimizing

solutions to meet new challenges and conditions This way ensuring effective development for long term competitiveness in a global environment This is necessary for the implementation of qualitative changes in the industrial policy Process Control and Production Management MTS 2018 is a collection of research papers from an international authorship The authors present case studies and empirical research which illustrates the progressive trends in business process management and the drive to increase enterprise sustainability development **From Head Shops to Whole Foods** Joshua C.

Davis,2017-08-08 In the 1960s and 70s a diverse range of storefronts including head shops African American bookstores feminist businesses and organic grocers brought the work of the New Left Black Power feminism environmentalism and other movements into the marketplace Through shared ownership limited growth and democratic workplaces these activist entrepreneurs offered alternatives to conventional profit driven corporate business models By the middle of the 1970s thousands of these enterprises operated across the United States but only a handful survive today Some such as Whole Foods Market have abandoned their quest for collective political change in favor of maximizing profits Vividly portraying the struggles successes and sacrifices of these unlikely entrepreneurs From Head Shops to Whole Foods writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption social enterprise buying local and mission driven business while also showing how today s companies have adopted the language but not often the mission of liberation and social change **Crisis Elections, New Contenders**

and Government Formation Anna Bosco,Susannah Verney,2018-12-07 The parliamentary elections of 2015 16 in Greece Spain and Portugal had extraordinary consequences bringing repeat elections unprecedented processes of government formation and uncharted government outcomes Greece formed a coalition of radical left and radical right and Portugal its first government supported by the communist party while Spain took ten months to get a government These developments are especially astonishing in three states which in previous decades were a byword for democratic stability After the transitions following the fall of their dictatorships in the 1970s Greece Spain and Portugal established bipolar electoral competition and predictable patterns of government formation But more recently all three countries have been in the frontline of the economic crisis and austerity implementation triggering electoral realignments and turning the radical left into a major player This volume offers essential understanding of the political destabilisation of Southern Europe It includes detailed analyses of all five crisis elections and of Greece s bailout referendum It also provides studies of the five new contender parties SYRIZA Podemos Ciudadanos the Bloco Esquerda and the Portuguese Communist Party which played a key role in government formation for the first time The chapters originally published as a special issue in South European Society and Politics **A Lever Long Enough** Robert McCaughey,2014-06-03 In this comprehensive social history of Columbia

University's School of Engineering and Applied Science SEAS Robert McCaughey combines archival research with oral testimony and contemporary interviews to build a critical and celebratory portrait of one of the oldest engineering schools in the United States McCaughey follows the evolving occasionally rocky and now integrated relationship between SEAS's engineers and the rest of the Columbia University student body faculty and administration He also revisits the interaction between the SEAS staff and the inhabitants and institutions of the City of New York where the school has resided since its founding in 1864 McCaughey compares the historical struggles and achievements of the school's engineers with their present day battles and accomplishments and he contrasts their teaching and research approaches with those of their peers at other free standing and Ivy League engineering schools What begins as a localized history of a school striving to define itself within a university known for its strengths in the humanities and the social sciences becomes a wider story of the transformation of the applied sciences into a critical component of American technology and education
