Ling, 2016-09-19 An inspiring reconception of the India China border as a space for the fluid exchange of culture trade and government European Energy Security and US-Russian Competition Ioanna Mavromati, 2025-10-31 This book argues that the influence of US Russian security competition on the energy policies of EU

member states and on the development of a unified European energy security policy has been significantly underestimated. While most previous studies have focused on internal EU dynamics and the role of Russian interests, this work takes a broader perspective by examining how transatlantic rivalries have shaped European approaches to energy security. By tracing the evolution of European energy security policy from the Cold War era through the present, the book connects shifts in policy to the changing dynamics of US-Soviet and later US-Russian energy competition. It demonstrates that after the Soviet Union's collapse, the United States did not initially view European reliance on Russian energy as a threat. However, as US-Russian competition intensified, Washington increasingly framed Europe's dependence on Russian gas as a security risk and actively sought to block the expansion of Russian energy infrastructure into Europe. The book also explores how, despite the EU's early treaties being energy focused, energy security only became a central foreign policy concern for the Union in the mid-2000s. Ultimately, the author argues that scholars of international relations must consider both great power dynamics and intra-European factors to fully understand the development of European energy policy. The book will be of interest to students and researchers in geopolitics, international relations, energy politics, regional studies, and European studies.

Sustainable Peace in Northeast Asia Yong-Shik Lee, 2023-09-05. *Sustainable Peace in Northeast Asia* examines the causes of lasting and complex tensions in the region from underlying political, historical, military, and economic perspectives, discusses their historical development and political-economic implications for the world, and explores possible solutions to build lasting peace. The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region. Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances, diplomacy, trade, and investment. The book also discusses the influence of these external powers over the crisis, their political and economic objectives in the region, their strategies, and the dynamics that their engagement has created. Both South Korea and North Korea have sought reunification of the Korean peninsula, which will have a substantial impact on the region. The book examines its justification, feasibility, and effects for the region. The book discusses the role of Mongolia in the context of the power dynamics in Northeast Asia. A relatively small country in terms of its population, Mongolia has rarely been examined in this context. *Sustainable Peace in Northeast Asia* makes a fresh assessment of its potential role.
