junctures in human history when resource regimes changed this book identifies the social problems that were meant to be solved by burning fossil fuels and the power hierarchies that shaped the decisions to use them Wagner argues that the key choices that led to the climate emergency were made relatively recently during the second half of the 20th century they are close enough in time for us to undo the prevailing social logic of fossil fuels By redefining the key problems that humankind is facing and reshaping the existing mechanisms of power we can take the decisive action needed to reduce our dependence on fossil fuels and avert the worst consequences of climate change
