Vernon, 2018-08-15 Praise from Jason Mendelson auth Venture Deals Patrick brings an educator's perspective and an entertainer's sensibilities to his overview of venture capital An approachable but disciplined overview of venture capital written by a professional musician turned business school professor over a 15 year period of teaching venture capital and startup classes at UNC Kenan Flagler Business School The book is a one stop shop for understanding venture capital distilling lessons from hundreds of interactions with VCs and founders Readers of the book will learn The core competencies of successful VCs What VCs are looking for in startups How venture capital differs from other forms of startup financing How the sharks on TV's Shark Tank are ruining venture capital The top two terms on any term sheet and a few other key terms Why VCs often behave like music industry professionals How to think like a VC Understanding how venture capital works in our economy can be of benefit to a wide variety of readers from entrepreneurs to corporate decision makers and everyone in between This book treats venture capital as a topic of entrepreneurial strategy not finance and includes a background of the industry an explanation of all aspect of the VC Job Cycle and a framework called VC Razor for performing due diligence Learning how to think like a venture capitalist can help anyone become a better decision maker Well organized clearly articulated this volume spans the gamut from beginner's overview to expert's guidebook Venture Capital has never been more important and this volume could not have been more timely Jerome Engel UC Berkeley Haas School of Business Patrick lays out important concepts and insights in an easy to understand and digest form As he clearly articulates in the book the way that venture capitalists think is valuable to anyone in business John F Clarke Dean of Graduate Programs Tulane University Why Write Another Venture Capital Book From the author Over the years as I have taught venture capital classes and run a worldwide venture capital competition I have struggled to find materials for my students I have been frustrated by the simultaneous abundance and lack of available content There is an abundance of terrific blogs written by VCs and founders often teaching specific lessons derived from specific situations Many VCs are prolific writers and have covered a wide variety of topics of the VC investment process However most blog postings have a very narrow scope and they are not organized into a coherent body of work They go deep in the weeds but the forest gets lost Similarly there is also an abundance of textbooks that treat venture capital as a topic of finance Wrong forest Venture capital is undeniably a subset of private equity However approaching the industry from that perspective ignores the vast majority of what VCs actually do If you would like to study venture capital as a finance subject there are many other books that will serve you better than this

one Treating venture capital as a topic of finance overemphasizes the importance of numbers For VCs number play a large role but just as important is the story about the numbers In this regard I will argue that VCs are more like journalists and filmmakers than financiers What I have not been able to find is a holistic overview of venture capital as a topic of strategy explaining its place in the broader entrepreneurial ecosystem It is not simply entrepreneurial finance VCs play a very important strategic role in commercializing technologies Just as importantly they employ specific strategies that we can learn and apply to our own entrepreneurial circumstances
