Two Paths to Prosperity Avner Greif, Joel Mokyr, Guido Tabellini, 2025-11-04. How the social organization of Europe and China shaped their divergent economic and political trajectories over the past millennium. In the eleventh century, when Europe was still backward and poor, China was a rich and sophisticated civilization. Yet Europe became the birthplace of democracy and the Industrial Revolution, driving the Great Enrichment, while China stagnated until the end of the twentieth century and was always ruled by autocracies. Two Paths to Prosperity traces the emergence of two very different social organizations in premodern China and Europe: the clan and the corporation, showing how they were key factors in the economic and political divergence of these two great civilizations. In this landmark book, three leading economists offer a bold new account of why Europe and China evolved along such different trajectories. In the early Middle Ages, public goods like risk sharing, religious worship, education, and conflict resolution were provided by nonstate organizations in both societies. China increasingly relied on kin-based cooperation within clans, while weaker kinship ties in Europe gave rise to corporations such as guilds, universities, and self-governing towns. Despite performing similar functions, clans and corporations were built on very different principles with lasting consequences until today. Providing a novel answer to a fundamental question in economic and political history, Two Paths to Prosperity shows how extended kinship in Chinese society facilitated the consolidation of autocracy and hindered innovation and economic development, and how corporations in Europe influenced emerging state institutions and set the stage for the Industrial Revolution.

The Circle of Fire P.J. Mazumdar, 2009-11-30. The Circle of Fire examines the eternal metaphysical questions: What is God? and What is the purpose of life? The book discusses the answers to these questions given by Western science and different schools of Indian thought, specifically detailing the answers to be found in India's two most developed atheistic traditions: Hinduism and Buddhism. Representative of a

generation of Indians who have grown up with the best in scientific education and spiritual values author P J Mazumdar takes a hard look at religion science and how two seemingly divergent bodies of knowledge can be brought together Like Deepak Chopra a generation earlier Mazumdar is both a medical doctor and a member of a family steeped in Hindu tradition and is therefore well placed to elucidate ancient Indian philosophy to the modern analytical mind Acknowledging the metaphysical insights to be found in both Western science and Eastern spirituality Mazumdar pays special attention to the highest school of philosophy of Hinduism Advaita and its application to practical spirituality through the teachings and practice of Yoga The book takes its structure from the Vedas and is similarly divided into Jnanakanda Knowledge and Karmakanda Actions the first part examines the body of knowledge from European and Indian sources addressing the question of God and the second part looks at practical ways of applying this knowledge through different schools of Hindu and Buddhist philosophy The book explores the purest form of nondual Hindu philosophy Advaita and points out how the theories underpinning Buddhism and Advaita although they appear to contradict each other are the only theories that remain consistent with the findings of modern science The author makes the brave assertion that ultimately one or the other will be the theory realized by science as the ultimate metaphysical truth Like other books on the meeting of science and spirituality Fritzjof Capra s 80s classic The Tao of Physics and the necessity of a scientifically compatible notion of God Richard Dawkin s The God Delusion The Circle of Fire is ambitious in scope and a challenging rewarding read

Paths of Individuation in Literature and Film Phyllis B. Kenevan, 1999-01-01. In his account of the individuation process, Carl G. Jung describes a spiritual goal for the individual as well as the collective. That process, as exemplified through archetypes in both literature and film, offers the reader insight into the variety and richness those paths may take. In this highly original book, Phyllis Berdt Kenevan provides an analysis of individuation and then explores four different individual paths of characters from the stories of Zorba the Greek, House of the Spirits, Crime and Punishment, and Bagdad Cafe. Kenevan then explores ways in which individuation can become a path for the collective, analyzing My Dinner with Andre, Wings of Desire, and various Dostoevsky novels. An engaging and thought-provoking look at archetypes as vehicles for interpretation, *Paths of Individuation in Literature and Film* is a must-read for courses in personal and social psychology, literary or film interpretation, Jung and philosophy, and psychology.
