

7-2 Inverses of Relations and Functions

You can also find and apply inverses to relations and functions. To graph the **inverse relation**, you can reflect each point across the line $y = x$. This is equivalent to switching the x - and y -values in each ordered pair of the relation.

Remember!

A *relation* is a set of ordered pairs. A *function* is a relation in which each x -value has, at most, one y -value paired with it.
