**Submarine Mass Movements and Their Consequences** Sebastian Krastel, Jan-Hinrich Behrmann, David Völker, Michael Stipp, Christian Berndt, Roger Urgeles, Jason Chaytor, Katrin Huhn, Michael Strasser, Carl Bonnevie Harbitz, 2013-09-02 Submarine mass movements are a hidden geohazard with large destructive potential for submarine installations and coastal areas This hazard and associated risk is growing in proportion with increasing population of coastal urban agglomerations industrial infrastructure and coastal tourism Also the intensified use of the seafloor for natural resource production and deep sea cables constitutes an increasing risk Submarine slides may alter the coastline and bear a high tsunamogenic potential There is a potential link of submarine mass wasting with climate change as submarine landslides can uncover and release large amounts greenhouse gases mainly methane that are now stored in marine sediments The factors that govern the stability of submarine slopes against failure the processes that lead to slope collapses and the collapse processes by themselves need to be better understood in order to foresee and prepare society for potentially hazardous events This book volume consists of a collection of cutting edge scientific research by international experts in the field covering geological geophysical engineering and environmental aspects of submarine slope failures The focus is on understanding the full spectrum of challenges presented by this major coastal and offshore geohazard

Advances in Protective Structures Research Hong Hao, Zhong-Xian Li, 2012-08-17 The International Association of Protective Structures IAPS was launched on 1 October 2010 in Manchester UK during the first International Conference of Protective Structures The primary purpose of IAPS is to bring researchers and engineers working in the area of protective structures together and to promote research and development work for b

Computational Methods in Earthquake Engineering Manolis Papadrakakis, Michalis Fragiadakis, Vagelis Plevris, 2013-05-30 This book provides an insight on advanced methods and concepts for the design and analysis of structures against earthquake loading This second volume is a collection of 28 chapters written by leading experts in the field of structural analysis and earthquake engineering Emphasis is given on current state of the art methods and concepts in computing methods and their application in engineering practice The book content is suitable for both practicing engineers and academics covering a wide variety of topics in an effort to assist the timely dissemination of research findings for the mitigation of seismic risk Due to the devastating socioeconomic consequences of seismic events the topic is of great scientific interest and is expected to be of valuable help to scientists and engineers The chapters of this volume are extended versions of selected papers presented at the COMPDYN 2011 conference held in the island of Corfu Greece under the auspices of the European Community on Computational Methods in Applied Sciences ECCOMAS

*Popular Science*, 1990-05 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will

help make it better      Advances in Structural Engineering Vasant Matsagar,2014-12-12 The book presents research papers presented by academicians researchers and practicing structural engineers from India and abroad in the recently held Structural Engineering Convention SEC 2014 at Indian Institute of Technology Delhi during 22-24 December 2014 The book is divided into three volumes and encompasses multidisciplinary areas within structural engineering such as earthquake engineering and structural dynamics structural mechanics finite element methods structural vibration control advanced cementitious and composite materials bridge engineering and soil structure interaction Advances in Structural Engineering is a useful reference material for structural engineering fraternity including undergraduate and postgraduate students academicians researchers and practicing engineers      **Size- and Age-Related Changes in Tree Structure and Function** Frederick C. Meinzer,Barbara Lachenbruch,Todd E. Dawson,2011-06-29 Millions of trees live and grow all around us and we all recognize the vital role they play in the world's ecosystems Publicity campaigns exhort us to plant yet more Yet until recently comparatively little was known about the root causes of the physical changes that attend their growth Since trees typically increase in size by three to four orders of magnitude in their journey to maturity this gap in our knowledge has been a crucial issue to address Here at last is a synthesis of the current state of our knowledge about both the causes and consequences of ontogenetic changes in key features of tree structure and function During their ontogeny trees undergo numerous changes in their physiological function the structure and mechanical properties of their wood and overall architecture and allometry This book examines the central interplay between these changes and tree size and age It also explores the impact these changes can have at the level of the individual tree on the emerging characteristics of forest ecosystems at various stages of their development The analysis offers an explanation for the importance of discriminating between the varied physical properties arising from the nexus of size and age as well as highlighting the implications these ontogenetic changes have for commercial forestry and climate change This important and timely summation of our knowledge base in this area written by highly respected researchers will be of huge interest not only to researchers but also to forest managers and silviculturists      Modular Multilevel Converters with Interleaved Half-Bridge Submodules Aleksandr Viatkin,2023-03-29 This book reports on a comprehensive study on a novel high power converter i.e. a Modular Multilevel Converter with Interleaved Half bridge Submodules ISM MMC It describes in depth its average model the operating principles as well as a new control method and a hybrid modulation strategy that help to exploit the benefits of the interleaving scheme The new power converter is particularly advantageous for high current applications that require superb quality of input/output waveforms Moreover this book reports on a systematic study of the current balancing problem between parallel connected units that commute in non simultaneous fashion This is a typical issue in interleaved converters however here it is analyzed for the first time in relation to MMC based structures Two control strategies are proposed to cope with this matter By using a sensorless regulation scheme the number of required current transducers has been

minimized reducing complexity cost and footprint of the hardware while providing converter with a fast and accurate current balancing This book also offers a comprehensive comparison between several practical designs of ISM MMC and classical MMC for an ultra fast electrical vehicle charger All in all it provides graduate students and researchers as well as field engineers and professionals with extensive information and essential practical details on the state of the art MMC and ISM MMC design *Environmental Health Perspectives*, 2010 Challenges and Opportunities for the EU Common Fisheries Policy Application in the Mediterranean and Black Sea Simone Libralato, Francesco Colloca, Ali Cemal Gücü, Christos D. Maravelias, Cosimo Solidoro, Sebastián Villasante, Massimiliano Cardinale, 2019-01-11 The application of the Common Fisheries Policy CFP in the Mediterranean and Black Sea faces several challenges also because of large ecological economic political and institutional differences across the basin The challenge of CFP application is exacerbated by the legal administrative situation with large areas outside national EU jurisdictions by the different development of fisheries that result in fleet capacities highly different on opposite shores of some sub basins as well as by uneven monitoring and data availability across the basins that result in situations that hamper sustainable management This book collates analyses related to the application of the principles included in the CFP in Mediterranean and Black Sea including assessments of current status scenario analyses visions of best solutions evaluation of critical hot spots and effects of regionalization of fisheries management The eBook tackles from local to transboundary issues and solutions and provides a broad vision of problems together with important practical solutions for CFP application in the Mediterranean and Black Sea Mobile Robots Janusz Będkowski, 2011-12-02 The objective of this book is to cover advances of mobile robotics and related technologies applied for multi robot systems design and development Design of control system is a complex issue requiring the application of information technologies to link the robots into a single network Human robot interface becomes a demanding task especially when we try to use sophisticated methods for brain signal processing Generated electrophysiological signals can be used to command different devices such as cars wheelchair or even video games A number of developments in navigation and path planning including parallel programming can be observed Cooperative path planning formation control of multi robotic agents communication and distance measurement between agents are shown Training of the mobile robot operators is very difficult task also because of several factors related to different task execution The presented improvement is related to environment model generation based on autonomous mobile robot observations

**Neuropsychological Practice with Veterans** Shane S. Bush, 2012-05-07 In *Neuropsychological Practice with Veterans* Bush endeavors to compile a comprehensive account of how neuropsychological research assessment and treatment of veterans are impacted by military status He succeeds brilliantly with this undertaking This is an essential text for those working with active duty service members and veterans and is highly recommended to all those seeking new perspectives Journal of the International Neuropsychological Society In *Neuropsychological Practice with Veterans* Dr Shane S Bush

provides a multifaceted overview of neuropsychological assessments and treatments associated with war veterans who have suffered from traumatic brain injury TBI during their service Somatic Psychotherapy Today Traumatic brain injury TBI afflicting approximately one third of injured veterans returning from duty in Iraq and Afghanistan is considered the signature injury in these conflicts In addition to TBI symptoms of posttraumatic stress disorder PTSD and major depression often afflict these veterans and contribute to neurological symptoms This is the first volume to provide a comprehensive overview of neuropsychologically grounded assessment treatment training and trends for clinicians who work with this population Encompassing the writings of clinicians and researchers experienced in working with the Veterans Administration VA population the book is grounded in an understanding of the unique culture of the veteran with its specialized service delivery methods and procedures In addition to its focus on veterans with TBI the text also addresses the assessment and treatment of aging veterans of previous military conflicts and of combat and non combat veterans with neurological and emotional problems related to aging substance abuse HIV hepatitis psychiatric disorders and other problems Key Features Addresses the growing need for neuropsychological assessment and treatment of returning veterans as well as aging veterans of earlier conflicts Focuses on traumatic brain injury posttraumatic stress disorder and major depression Discusses assessment of malingering faking benefits pension return to work evaluations polytrauma management and training concerns Written by clinicians and researchers experienced in working with veterans Edited by a neuropsychology specialist who is well known in the VA community *ASTER 20th Anniversary* Yasushi Yamaguchi, Michael J. Abrams, 2020-04-09 The Advanced Thermal Emission and Reflection Radiometer ASTER is a research facility instrument on NASA's Terra spacecraft We celebrated the 20th anniversary of ASTER's launch in December 1999 ASTER has been providing high spatial resolution multispectral data in the VNIR SWIR and TIR regions and along track stereo data Starting April 2016 ASTER data have been distributed to the public at no cost Another important and the most popular data set is the ASTER Global DEM which covers almost the entire land surface at a 30 m grid size ASTER data have been widely used in a variety of application areas such as land surface mapping and change detection volcano and other natural hazard monitoring mineral exploration and urban heat island monitoring This Special Issue consists of 12 papers 2 reviews 9 articles and 1 technical note and covers topics including development of new techniques to process ASTER data calibration activities to ensure long term consistency of ASTER data validation of the ASTER data products and scientific achievements using ASTER data **New Insights on Gamma Rays** Ahmed M. Maghraby, 2017-05-24 Gamma radiation has been discovered since more than a century and contributed in many achievements in human life Continuous developments make it necessary to have more understandings and more discussions about well established concepts as well as newly implemented hypothesis and applications of gamma rays This book presents new visions of gamma ray spectrometry and applications I hope this book can present part of the useful applications of gamma rays Transforming Chaplaincy Steve Nolan, Annelieke Damen, 2021-10-28 Evidence based medicine has

transformed contemporary medical practice For over twenty five years George Fitchett has been a pioneering advocate of the view that evidence based spiritual care can and should equally transform chaplaincy This book collects a key selection from his ground breaking research As models of good research practice these papers demonstrate the real world value of research and introduce their readers to issues that have continuing importance to spiritual care and professional chaplaincy As such this collection offers an ideal introduction to spiritual care research The collection is complemented by three essays specially commissioned from observers well positioned to comment on future directions for both professional chaplaincy and spiritual care research
