increasingly clear that nurse practitioners and physician assistants will be called on to move into roles caring for patients with urologic disease Use of NPs and PAs to their highest education will become an increasingly important strategy for maintaining access and reducing costs in the context of urologist workforce that is shrinking However urology topics receive sporadic attention in NP and PA curricula leaving practicing NPs and PAs with gaps in their knowledge concerning trends and recommendations for management of urologic health conditions As this demand for provider visits for urologic concerns increases the demand for provider services to care for patients with urologic health concerns will also increase and presents the opportunity for both NPs and PAs to move into specialty practice environments within urology Library of Congress
