Adaptive Governance in Carbon Farming Policies Nooshin Torabi, 2018-07-25. This book discusses a variety of different perspectives involved in biodiversity management and bio sequestration projects in Australia working towards achieving adaptive governance in carbon farming. It not only examines landholders' motivation but also the challenges of integrating biodiverse forests into the agricultural landscape. Drawing on the contrast between science and policy stakeholders' views on carbon farming and the practical challenges of achieving adaptive governance, the book discusses the significant gap between theory and practice encountered in this field of study. The book suggests ways of improving the decision making capacity of government officials and policymakers involved in managing carbon and biodiversity markets as well as introducing measures to promote adaptive governance by engaging landholders in more effective land conservation. Climate change is a pressing issue on the global political agenda and this book makes an important contribution to the ongoing debate. This book will be an invaluable reference for practitioners, policymakers and researchers interested in alternative forms of governance in natural resource management.

Reproductive and Developmental Toxicology Ramesh C Gupta, 2011-04-04. Reproductive toxicology is a complex subject dealing with three components: parent, placenta and fetus and the continuous changes that occur in each. *Reproductive and Developmental Toxicology* is a comprehensive and authoritative resource providing the latest literature enriched with relevant references describing every aspect of this area of science. It addresses a broad range of topics including nanoparticles and radiation, gases and solvents, smoking, alcohol and drugs of abuse, food additives, nutraceuticals and pharmaceuticals and metals among others. With a special focus on placental toxicity, this book is the only available reference to connect the three key risk stages and is the only resource to include reproductive and developmental toxicity in domestic animals, fish and wildlife. Provides a complete integrated source of information on the key risk stages during reproduction and development. Includes coverage of emerging science such as stem cell application, toxicoproteomics, metabolomics, phthalates, infertility, teratogenicity, endocrine disruption, surveillance and regulatory considerations and risk assessment. Offers diverse and unique in vitro and in vivo toxicity models for reproductive and developmental toxicity testing in a user friendly format that assists in comparative analysis.
