FAO questionnaire results on genetically modified food safety assessment Food and Agriculture Organization of the United Nations, 2020-05-01 In 2008 the Codex Alimentarius members agreed that it is important for countries to globally

share the results of genetically modified GM food safety assessment and subsequently the Food and Agriculture Organization of the United Nations FAO is hosting an online database entitled FAO GM Foods Platform <http://www.fao.org/gmplatform> to share the relevant data. As of September 2019, only 23 out of 189 Codex members have been able to share the relevant data. In order to understand the challenges countries may be facing in conducting GM food safety assessment, two separate sets of questionnaires were sent to all 189 Codex members in July 2019. Questionnaire A was sent to 166 Codex members who had not shared any GM food safety assessment result on the platform, while questionnaire B was sent to those 23 Codex members who have been actively sharing the GM food safety assessment results on the Platform. A total of 116 Codex members responded between July and September 2019. All responses are recorded as they were received. While the present document is a simple compilation of the responses, a complete analysis of the results was made and integrated into another FAO publication entitled *Reality of GM food safety: Are we effectively evaluating it?* Technical Background Paper for the FAO GM Foods Platform Community Meeting 2019. *OUR FRAGILE WORLD: Challenges and Opportunities for Sustainable Development - Volume I* M. K. Tolba, 2001-08-23. This publication, *Our Fragile World: Challenges and Opportunities for Sustainable Development*, presents perspectives of several important subjects that are covered in greater detail and depth in the *Encyclopedia of Life Support Systems (EOLSS)*. The contributions to the two volumes provide an integrated presentation of knowledge and worldviews related to the state of Earth's natural resources, social resources, institutional resources, and economic and financial resources. They present the vision and thinking of over 200 authors in support of efforts to solve the complex problems connected with sustainable development and to secure perennial life support on The Blue Planet. These contributions are holistic, informative, forward-looking, and will be of interest to a broad readership. This volume presents contributions with focus on the Natural and Social Dimensions of sustainable Development in two sections: NATURAL SYSTEMS AND RESOURCES (Natural Systems and Climate Change, Natural Resources Management) and SOCIO CULTURAL ISSUES (Human Security, Peace and Socio Cultural issues, Equity and Ethical issues).
