The book comprises two parts. The first part focuses on the representation of historical facts about cyber literary criticism, covering five topics: the evolution of cyber literary criticism in the context of the new media, major types of cyber literary critics, and their criticism, academic achievements in cyber literary studies, the form, contents, and rhetorical expressions of so-called netizens' critical commentaries, and important events in the history of cyber literary criticism. The second part discusses the historical changes in literary criticism as responses to cyber literature, covering another five topics: the conceptual transformation in literary criticism of the Internet era, the establishment of evaluation criteria for cyber literature, changes in the function of cyber literary criticism, changes in the constitution of cyber literary critics, and the impact of cyber literary criticism.
