fishing skills and as such has an important role to play in global and regional conservation and management of fishery resources Despite this it is defined as being distinct from a state in the relevant legal documents resulting in unclear circumstances involving certain global and regional agreements which usually apply to the latter This ambiguity is particularly prevalent in legal procedures on the high seas when the sovereignty of a state comes into question such as boarding and inspection This book provides a detailed definition of the role of the fishing entity in the international law of the sea and its obligations and rights in high seas fishery enforcements *Parliamentary Papers* Great Britain.
