Muhammad Zahid Mumtaz, Maqshoof Ahmad, Hassan Etesami, Adnan Mustafa, 2024-04-18 Bioweathering is the dissolution of rocks and mineral substrates carried out by microorganisms along with mechanical and chemical processes The application of bacteria in biomining is a biotechnological approach for the extraction and recovery of metals from ores Microbes interact with minerals as a strategy to colonize and exploit habitats where the environmental parameters disadvantage other microorganisms and they demonstrate the capacity to scavenge critical elements with low bioavailability such as iron and phosphorus There is an ongoing need to improve soil fertility and crop production particularly in dry places to remediate toxic soils and clean stone artworks and structures A more complete understanding of the ecology of mineral weathering processes mediated by the microbiome may provide a significant opportunity for researchers to develop novel solutions to developing challenges in agriculture the environment and industry

 Bolotnikov,Sanne ter Horst,André C.M. Ran,Victor Vinnikov,2019-04-08 This volume is devoted to Joseph A Joe Ball s
 contributions to operator theory and its applications and in celebration of his seventieth birthday Joe Ball s career spans over
 four and a half decades starting with his work on model theory and related topics for non contractions and operators on
 multiply connected domains Later on more applied operator theory themes appeared in his work involving factorization and
 interpolation for operator valued functions with extensive applications in system and control theory He has worked on
 nonlinear control time varying systems and more recently on multidimensional systems and noncommutative H theory on the
 unit ball and polydisk and more general domains and these are only the main themes in his vast oeuvre Fourteen research
 papers constitute the core of this volume written by mathematicians who have collaborated with Joe or have been influenced
 by his vast mathematical work A curriculum vitae a publicationslist and a list of Joe Ball s PhD students are included in this

Interactions, Mechanisms of Action, and Applications, volume III Alok Kumar Srivastava, George Newcombe, Gustavo Santoyo, Prem Lal Kashyap, 2025-11-11 Due to the success of the original Research Topic and the following Volume II we have decided to launch a Volume III of Plant Microbiome Interactions Mechanisms of Action and Applications The relationship between plants and their surroundings especially those plant microbe interactions with a beneficial output remain the center of considerable attention Plants depend on their microbiomes for multifarious life supporting activities including nutrient acquisition and augmentation of their defense systems against biotic and abiotic stresses The interactions between a plant and its microbiome are highly complex and dynamic in nature The plant immune system in particular is thought to have a profound impact in determining the plant microbiome structure and diversity Characterizing the plant microbiome and its function could be applied for better crop design and management especially in resource limited environments and to protect plants from intruding pathogens Therefore a deep understanding of the interrelationships of the soil plant microorganism system is essential for improving the efficacy and potential applications of plant growth promoting inocula for achieving sustainable food security and development Recent studies of plant growth promoting rhizobacteria show that cocktails of useful bacteria in the form of synthetic communities are better than single inoculants which face competition from other microorganisms and could be killed or suppressed under sub optimal conditions Microbial activity should also be considered in the construction of microbial co inoculants Understanding plant microbe interactions and mechanisms will also help in the development of smart microbial fertilizer formulation and application in the future This Research Topic welcomes the following subtopics Interactomics for sustainable agriculture studies using novel combinatorial approaches employing computational expertise to analyze the data from genomics transcriptomics metabolomics and proteomics based studies leading to identification of targets and validating wet lab experiments with molecular evidence for resolving issues in agriculture and sustainability Please note that purely descriptive sequencing studies will not be considered Plant microbiome studies deciphering the structure and composition of complex microbial communities associated directly or indirectly with the plant i.e endophytic epiphytic and rhizospheric communities and their significance Topic Editors Alok Kumar Srivastava and Prem Lal Kashyap have created commercial products related to the Topic All other topic editors declare no competing interests with regard to the Research Topic subject
