Rybicki, Kazuhito Fujiyama, 2017-04-27 Plant gene transfer achieved in the early 80s paved the way for the exploitation of the potential of gene engineering to add novel agronomic traits and or to design plants as factories for high added value molecules For this latter area of research the term Molecular Farming was coined in reference to agricultural applications in that major crops like maize and tobacco were originally used basically for pharma applications The concept of the green biofactory implies different advantages over the typical cell factories based on animal cell or microbial cultures already when considering the investment and managing costs of fermenters Although yield stability and quality of the molecules may vary among different heterologous systems and plants are competitive on a case to case basis still the plant factory attracts scientists and technologists for the challenging features of low production cost product safety and easy scale up Once engineered a plant is among the cheapest and easiest eukaryotic system to be bred with simple know how using nutrients water and light Molecules that are currently being produced in plants vary from industrial and pharmaceutical proteins including medical diagnostics proteins and vaccine antigens to nutritional supplements such as vitamins carbohydrates and biopolymers Convergence among disciplines as distant as plant physiology and pharmacology and more recently as omic sciences bioinformatics and nanotechnology increases the options of research on the plant cell factory Farming for Pharming biologics and small molecule medicines is a

challenging area of plant biotechnology that may break the limits of current standard production technologies The recent success on Ebola fighting with plant made antibodies put a spotlight on the enormous potential of next generation herbal medicines made especially in the name of the guiding principle of reduction of costs hence reduction of disparities of health rights and as a tool to guarantee adequate health protection in developing countries *Circularity of Cementitious*

Bech-Danielsen,Aina Landsverk Hagen,Madlen Kobi,Ying Zhou,2025-11-28 This handbook provides fresh insights into the debates and challenges that unfold in the cross disciplinary field of architecture and anthropology Based on studies of empirical contexts across the globe the authors launch and test a broad variety of methods and advance various theoretical concepts Architecture and anthropology have always had overlapping interests but a range of developments in both areas make it more relevant than ever to intersect overlap combine or even merge the two disciplines In anthropology the spatial material and nonhuman turns have paved the way for an increasing interest in and need for of changing the world rather than just studying it On the other hand architecture beyond designing structures has become interested in the uses and processes that unfold in during and after construction The contemporary research and practices in both disciplines are testimonies that a cross disciplinary exchange is inspiring for engaging with and responding to the challenges of a world in

ecological societal and political turmoil This handbook addresses established scholars students and practitioners alike by outlining contemporary developments and tensions at the intersection of architecture and anthropology

Concrete Permeability and Durability Performance Roberto J. Torrent,Rui D. Neves,Kei-ichi Imamoto,2021-12-22 Durability and service life design of concrete constructions have considerable socio economic and environmental consequences in which the permeability of concrete to aggressive intruders plays a vital role Concrete Permeability and Durability Performance provides deep insight into the permeability of concrete moving from theory to practice and presents over 20 real cases such as Tokyo s Museum of Western Art Port of Miami Tunnel and Hong Kong Zhuhai Macao sea link including field tests in the Antarctic and Atacama Desert It stresses the importance of site testing for a realistic durability assessment and details the Torrent Method for non destructive measurement of air permeability It also delivers answers for some vexing questions Should the coefficient of permeability be expressed in m^2 or $m\ s$ How to get a mean pore radius of concrete from gas permeability tests Why should permeability preferably be measured on site How can service life of reinforced concrete structures be predicted by site testing of gas permeability and cover thickness Practitioners will find stimulating examples on how to predict the coming service life of new structures and the remaining life of existing structures based on site testing of air permeability and cover thickness Researchers will value theoretical principles testing methods as well as how test results reflect the influence of concrete mix composition and processing

Performance-Based Specifications and Control of Concrete Durability Hans Beushausen,Luis Fernandez Luco,2015-09-24 This work gives an overview of significant research from recent years concerning performance based design and quality control for concrete durability and its implementation In engineering practice performance approaches are often still used in combination with prescriptive requirements This is largely because for most durability test methods sufficient practical experience still has to be gained before engineers and owners are prepared to fully rely on them This book compiled by RILEM TC 230 PSC is intended to assist efforts to successfully build the foundation for the full implementation of performance based approaches through the exchange of relevant knowledge and experience between researchers and practitioners worldwide
