*Department of Defense Appropriations for 2015: FY 2015 Department of Defense budget overview; FY 2015 Navy United States. Congress. House. Committee on Appropriations. Subcommittee on Department of Defense, 2015* **India and Network-Centric Warfare** Kartik Bommakanti, 2025-11-14 This book analyses India's Network Centric Warfare (NCW) capabilities and how well they are integrated into the Indian armed forces especially the Indian Army. It explores primarily the technological and to a more limited extent the doctrinal and organisational issues that are related to NCW. It assesses how three technologies that are central to NCW: cyber, electronic warfare and space are being developed and integrated by the Indian armed services. In addition, it also analyses partially how the Indian armed services acquire and integrate Artificial Intelligence and Quantum Technology in specific areas and also explores the need for the Indian armed services to acquire Kinetic Energy Weapons (KEWs) and Directed Energy Weapons (DEWs) especially microwave and laser weapons. A part of the International Politics in the Age of Disruption series, the book will be indispensable for students and researchers of military studies, security studies, cyber warfare, political studies, international relations, security studies and South Asian studies.

**Proceedings of the 15th International Marine Design Conference** Austin A. Kana, 2024-08-22 The 15th International Marine Design Conference (IMDC) 2024 was organized by the Department of Maritime and Transport Technology, Delft University of Technology and was hosted by the Netherlands Defence Materiel Organisation at the Marine Etablissement Amsterdam MEA. The aim of the IMDC is to promote all aspects of marine design as an engineering discipline. The focus of IMDC 2024 is on the key design challenges and opportunities in the maritime field with special emphasis on the following themes: Ship design methodology issues such as design spiral, systems engineering, set-based design, design optimisation, concurrent design, modular design, configuration based design or fuzzy design aspects. Novel marine design concepts such as hull form design, transport ships, service vessels, naval vessels, yachts and cruise ships or specialized and complex vessels. Offshore design methodology such as applications to offshore wind turbines, semi-submersibles, floating fish farms or floating cities. Influence of energy transition on maritime design including both zero emission and high power and energy systems. Influence of unmanned and autonomous transition on maritime design. Influence of digital transition on maritime design such as digital shadows and twins, model-based systems engineering, AI, ML and big data. Influence of regulations on maritime design. Maritime design education. **Federal Register**, 2014 **Regulations Governing the Employment of Civil Personnel Under the Naval Service** United States Civil Service Commission, 1930 Hearing on National Defense Authorization Act for Fiscal Year 2015 and Oversight of Previously Authorized Programs Before the Committee on Armed Services, House of Representatives, One Hundred Thirteenth Congress, Second Session United States. Congress. House. Committee on Armed Services. Tactical Air and Land Forces Subcommittee, 2014 **Nanoweapons** Louis A. Del Monte, 2017 Nanoweapons just might render humanity extinct in the near future, a notion that is frightening and

shocking but potentially true In Nanoweapons Louis A Del Monte describes the most deadly generation of military weapons the world has ever encountered With dimensions one thousandth the diameter of a single strand of human hair this technology threatens to eradicate humanity as it incites world governments to compete in the deadliest arms race ever In his insightful and prescient account of this risky and radical technology Del Monte predicts that nanoweapons will dominate the battlefield of the future and will help determine the superpowers of the twenty first century He traces the emergence of nanotechnology discusses the current development of nanoweapons such as the mini nuke which weighs five pounds and carries the power of one hundred tons of TNT and offers concrete recommendations founded in historical precedent for controlling their proliferation and avoiding human annihilation Most critically Nanoweapons addresses the question Will it be possible to develop deploy and use nanoweapons in warfare without rendering humanity extinct Department of Defense Authorization for Appropriations for Fiscal Year 2017 and the Future Years Defense Program: Strategic forces United States. regimes various views are provided on the right of visit the use of force and the use of detention This volume which has contemporary naval operations as its central focus and structures the analysis as a sub discipline of the international law of military operations will be of great interest both to academics practitioners and policy advisors working or involved in the field of military and naval operations and to those professionals wanting to learn more about the international law of military operations naval operations and the law of the sea and maritime security Martin Fink is a naval and legal officer in the Royal Netherlands Navy

**Naval Constabulary Operations and Fisheries Governance** Sean A. G. Andrews, 2024-05-07 This book offers an analysis of naval constabulary operations in particular Australian fisheries patrols and challenges the widely accepted Anglo American school of maritime thought In the Indo Pacific fisheries and the activities of fishing boats are of increasing strategic importance in Australia s region Australia s Four Oceans Issues of overfishing population growth and climate change are placing growing pressure on fish as a resource and in doing so are making fisheries more significant and significant on a strategic as opposed to simply an economic or environmental level When combined with the growing use of fishing vessels as para naval forces it is clear that the activities of fishing vessels whether fishing or not fishing are matters of considerable strategic relevance This book illuminates contemporary seapower challenges explains and defines maritime security and examines and refines existing theory to advance a set of new or refined concepts to help frame the on water activities of constabulary operations reducing the possibility of on water miscalculation between states This book will be of much interest to students and scholars of naval studies and sea power maritime strategy maritime security and International Relations

**The Contemporary German Navy as an Instrument of Foreign Policy** Moritz Brake, 2024-12-06 Since the Cold War and beyond the Zeitenwende Germany has increasingly come to rely on its navy as an instrument of foreign policy The German Navy supports comprehensive maritime security and ocean governance and its missions not only reflect its own evolution but also change within Germany This is a marked shift for the continental power Germany and forms a substantial component of its much broader maritime turn in the 21st century Changes in strategic context new security challenges and Germany s evolving international role after reunification have altered the perception of the navy s utility Its share in the Bundeswehr s personnel has grown and the navy has seen proportionally higher investment or relatively less cuts owing to the post Cold War peace dividend than either army or airforce The author shows that the navy has markedly changed and become increasingly useful for Germany s foreign policy something which in the stormy seas of geopolitical escalation of the Zeitenwende has already paid dividends

*Systems Engineering in Context* Stephen Adams, Peter A. Beling, James H. Lambert, William T. Scherer, Cody H. Fleming, 2019-06-21 This volume chronicles the 16th Annual Conference on System Engineering Research CSER held on May 8 9 2018 at the University of Virginia Charlottesville Virginia USA The CSER offers researchers in academia industry and government a common forum to present discuss and influence systems engineering research It provides access to forward looking research from across the globe by renowned academicians as well as

perspectives from senior industry and government representatives Co founded by the University of Southern California and Stevens Institute of Technology in 2003 CSER has become the preeminent event for researchers in systems engineering across the globe Topics include though are not limited to the following Systems in context Formative methods requirements Integration deployment assurance Human Factors Safety and Security Decisions Control Systems Modeling Optimization Multiple Objectives Synthesis Risk and resiliency Collaborative autonomy Coordination and distributed decision making Prediction Prescriptive modeling state estimation Stochastic approximation stochastic optimization and control Integrative Data engineering Sensor Management Design of Experiments      **Tactics of Naval Combat Arms** Milan Vego, 2025-11-04

This new volume from the Blue and Gold Professional Library describes and analyzes the tactical employment of naval combat arms including surface forces submarine forces naval aviation and naval special forces in a high intensity conventional war at sea Tactics of Naval Combat Arms is framed by combat missions of each naval combat arm and explained as part of the much broader operational framework of obtaining or denying sea control Tactical techniques and applications are explained in accessible terms including coverage of naval special forces and respective unmanned vehicles The book contains extensive resources covering the scouting methods used by surface combatants attack submarines and naval combat ASW aircraft avoidance maneuvering by submarines and use of weapons by naval aircraft Written as a sequel to Milan Vego's General Naval Tactics this new work offers essential insight for naval tacticians and strategists      **United States Code**

**Thinking** Aaron P. Jackson, 2024-09-30 This book examines the newly emergent field of military design thinking how it has been developed inside and outside of military doctrine and the paradigms that underlie its key thinkers and methodologies From the emergence of its initial methodologies in the late 1990s military design thinking's development rapidly accelerated in the mid 2000s in response to perceived failures of existing military doctrine and practice to adapt to the wars of the early 21st century To establish a foundation for exploring the significance of the challenge military design thinking presented to dominant approaches to warfare the early chapters in the book examine the ontology and epistemology of military doctrine which is defined as a written expression of a military's institutional belief system regarding how to wage war They also explain how attempts to incorporate military design thinking into doctrine ultimately led to its assimilation into this belief system requiring military design thinkers to continue to explore and develop the field outside of doctrine Since the mid 2010s non doctrinal military design methodologies have become increasingly prominent within several Western militaries including the US Canada UK Australia and several European militaries Later chapters offer an exploration of the paradigms underlying non doctrinal as well as doctrinal design methodologies This book highlights how the field has evolved shows how military design thinking differs from its civilian equivalents developed in fields such as commerce and business management and discusses how it may evolve in the near future This book will be of much interest to students of military studies security studies and international relations as well as to military professionals
