Urban Water Governance in Postcolonial Zimbabwe Abraham R. Matamanda,Tazviona R. Gambe,Johannes I. Bhanye,Tafadzwa C. Maramura,Oratilwe Annastacia Khoza,2025-09-04 This book focuses on urban water supply and governance in the Global South using urban Zimbabwe as a case study to provide insights and perspectives into the realities of the water governance Applying a resilience and

sustainability perspective we argue that fragmentation of responsibilities between various institutions the difficulty of coordination at various levels and the politics centered on water supply constrain effective water governance in Zimbabwe This has resulted in a downward spiral in urban water services in Zimbabwe s urban centers Additionally the innovative nature of this study is to draw from an often neglected dimension in urban water governance which is the political ecology which brings into perspective the varying interests associated with environmental contests and conflicts that influence water allocation and sharing among urban areas by the public sector Therefore this book dwells on understanding the politics economic and ecology of water governance through an interdisciplinary lens This analysis is critical for this study because Zimbabwe s current state of obsolete water infrastructure has also had a negative impact on the supply of high quality portable water services to the public in urban areas This book will be a critical read for academic and professionals in the fields of urban geographers planners sociologists and water experts It will also be useful for undergraduate and postgraduate students from Geography Urban and regional Planning Political Science Development Studies and Economics

Resilience and Sustainability in Urban Africa Innocent Chirisa, Andrew Chigudu, 2021-08-02 Resilience has become a very topical issue transcending many spheres and sectors of sustainable urban development This book presents a resilience framework for sustainable cities and towns in Africa The rise in informal settlements is due to the urban planning practices in most African cities that rarely reflect the realities of urban life and environment for urban development Aspects of places people and process are central to the concept of urban resilience and sustainable urban growth It stems from the observation that urban vulnerability is on the increase in Zimbabwe and beyond In history disasters have adversely affected nations across the world inflicting wide ranging losses on one hand while on the other hand creating development opportunities for urban communities Cooperation in disaster management is a strategy for minimising losses and uplifting the affected urban settlements The significance of urban planning and design in the growth and development of sustainable urban centres is well documented Urbanisation has brought with it challenges that most developing countries such as Zimbabwe are not equipped to handle This has been accompanied by problems such as overpopulation overcrowding shortages of resources and the growth of slum settlements There need is to seriously consider urban planning and design in order to come up with contemporary designs that are resilient to current urban challenges There are major gaps in urban resilience building for instance in Harare and the local authority needs to prioritise investment in resilient urban infrastructure
