ECGBL2015-9th European Conference on Games Based Learning Robin Munkvold and Line Kolås, 2015-09-18 These proceedings represent the work of researchers participating in the 9th European Conference on Games Based Learning which is being hosted this year by Nord Trondelag University College Steinkjer Norway on the 8-9 October 2015. ECGBL continues to evolve and develop and the wide range of papers and topics will ensure an interesting two-day conference. In addition to the main streams of the conference, there are mini tracks focusing on the areas of the design of multiplayer collaborative serious games applied Games and gamification, the teacher's role in game-based learning, games for STEM, Science, Technology, Engineering, Mathematics, learning assessment of digital game-based learning and pervasive and ubiquitous gaming for learning. In addition to the presentations of research, we are delighted to host the third year of the Serious Game competition which provides an opportunity for educational game designers and creators to participate in the conference and demonstrate their game design and development skills in an international competition. This competition is again sponsored by SEGAN Serious Games Network. With an initial submission of more than 60 games, 28 finalists will present their games at the conference. Contemporary societies strive for multiculturalism and tolerance To create conditions to reach this ideal there should be a continuum between what the social actors are prepared for in school practices they encounter at the workplace and the way they contribute to the wider society This continuum should be materialized in consistent conceptualizations and practices of diversity and inclusion across educational organizational and societal contexts So far research suggests that policies implemented in those settings have mixed results This is partly because policies in different fields use distinct conceptual definitions of diversity and inclusion Thus important gaps exist between research and policy implementation and there is little dialogue between research in educational and organizational environments In education inclusive practices focus on students with special needs broader definitions of diversity being neglected In organizations the emphasis is largely on diversity inclusion being a more recent research topic and practice Research conducted at societal level addresses the comprehensive ideologies underlying diversity and inclusion To move forward a dialogue that builds bridges between the various types fundamental vs applied and fields of research educational organizational and societal is crucial Only then can this shared understanding be reached as well as the continuum of goals concepts and practices
