Romano, Alistair Dove, Heather Jane Koldewey, 2025-02-13 As zoological organizations evolve in the twenty first century to address the biodiversity extinction crisis and proactively demonstrate relevance in a changing public opinion landscape their conservation science portfolios continue to expand Public zoos and aquariums address these issues directly by conducting both ex and in situ research designed to advance our understanding of species while also detecting diagnosing and halting population declines in the wild In particular the distinct nature of zoological organizations uniquely positions them to make significant contributions to marine science The ability to care for and access a diverse suite of marine species provides the opportunity to understand their behavior biology physiology which can inform ex situ investigations Moreover the broad skillsets of staff facilitate extensive collaborative research opportunities These ongoing contributions to marine science have remained relatively underappreciated by others outside the community Here we intend to raise awareness about these contributions and initiate further collaborative research opportunities Building on an increasing body of literature our goal is to curate a diverse portfolio of research that represents the contributions of zoos and aquariums to the field of marine science and to highlight the novel qualities of these conservation based organizations These can broadly be divided into four main categories i Infrastructure extensive capacity to care for a wide variety of animals extensive veterinarian hospital spaces and equipment advanced water quality and microbiology labs research vessels and the generation of funds through ticket sales and contributions ii Animal care expertise in maintaining animals under professional

El español, lengua pluricéntrica Sebastian Greußlich, Franz Lebsanft, 2019-12-09 Fragen der Norm wurden für das Spanische bis weit ins 20. Jahrhundert ausschließlich von der Real Academia Española geklärt. Unter den Vorzeichen der Globalisierung und der sich immer stärker etablierenden Konzeption der Plurizentrik teilt die Sprachakademie diese Rolle zunehmend mit neuen Akteuren. Neben den Akademien in Spanischamerika treten vor allem die Massenmedien auf dem Feld der spanischen Sprachkultur in Erscheinung. In Fragen praktischer Sprachkodifikation kooperieren sie systematisch mit den Sprachakademien, zugleich aber fordern sie diese heraus, indem sie den Sprachgebrauch der Hispanophonie jenseits von Sprachpolitik und Didaktik mit eigenen massenkommunikativ vermittelten Normen prägen. Die Beiträge des Bandes beleuchten diesen Zusammenhang empirisch. Las cuestiones referentes a la norma del español hasta bien entrado el siglo XX se han resuelto exclusivamente en el seno de la Real Academia Española. Bajo los auspicios de la globalización y del pluricentrismo lingüístico la Academia de la Lengua va compartiendo esta función con nuevos actores. Aparte de las Academias hispanoamericanas, estos son ante todo los medios de comunicación masiva. En la práctica de la codificación lingüística, dichos medios colaboran sistemáticamente con las Academias de la Lengua al mismo tiempo que las desafían marcando el uso de la lengua mediante sus normas propias más allá de la política lingüística y la enseñanza de la lengua. Las contribuciones reunidas en este volumen abren perspectivas teóricas, ideológicas y empíricas sobre este fenómeno.

The broad technical content has been structured according to five technology levels, addressing all components. Relevant ISO standards are considered in all chapters. The book covers historical highlights, tractor project management including cost management, traction mechanics, tires including inflation control, belt ground drives, and ride dynamics. Further topics are chassis design, diesel engines with

emission limits and installation instructions all important types of transmissions topics in machine element design and human factors health safety comfort Moreover the content covers tractor implement management systems in particular ISOBUS automation and hydraulic systems Cumulative damage fundamentals and tractor load spectra are described and implemented for dimensioning and design verification Fundamentals of energy efficiency are discussed for single tractor components and solutions to reduce the tractor CO2 footprint are suggested
