Designs of Sensor Placement in Water Distribution Systems Shweta Rathi, Rajesh Gupta, D. P. Kothari, 2025-09-25 The dual purpose of regular monitoring and contaminant event detection in the water distribution systems WDSs can be achieved through sensors that can monitor general water quality constituents such as pH residual chlorine conductivity temperature etc This book details different sensor placement parameters considered for contamination detection and regular routine water quality monitoring in WDSs and their evaluations It covers genetic algorithm GA based methodology selecting a specified number of optimal sensor locations using combined weighted objectives Applications to different pressure deficient systems and intermittent systems are explained as part of a case study in India Features Reviews existing methodologies on the solutions to water contamination and sensor placements in the water distribution systems WDSs Discusses regular water quality monitoring techniques including the methodology and guidelines of water quality monitoring techniques Includes applications on the methodologies under different cases such as PDA considering risk based sensor placement Provides illustrative examples with the proposed alternative algorithm both for single and multi source networks Examines applications of the proposed GA based optimal sensor location modeled to a real life scenario This book is aimed at graduate students and researchers in civil engineering civil and environmental engineering environmental engineering hydraulic engineering water supply resources engineering and hydro informatics

UHPCC Under Impact and Blast Qin Fang, Hao Wu, Xiangzhen Kong, 2021-02-22 This book is about the Ultra high Performance Cementitious Composites UHPCC which is a relatively new type of cementitious materials UHPCC has very low water to binder ratio high amount of high range water reducer fine aggregates and high strength steel or organic fibers With the prominent mechanical properties e g high compressive and tensile strength high ductility and high fracture energy UHPCC has been becoming the most prospective construction cement based material for both civil and military structures to resist high speed projectile penetration low velocity impact and blast loadings In this book the related work conducted by authors on the static and dynamic mechanical properties as well as the impact and blast resistance of UHPCC are presented This book is written for the researchers engineers and graduate students in the fields of protective structures and terminal ballistics

Guidelines for Open Pit and Waste Dump Closure Phil de Graaf, Geoff Beale, Trevor Carter, 2025-05-01 *Guidelines for Open Pit and Waste Dump Closure* provides a benchmark reference for geotechnical and hydrogeological professionals and other closure stakeholders involved in assessing and implementing the closure of open pits and waste dumps It defines a state of best practice geotechnical and hydrological pathway that reflects current industry wide experience considers the perspectives of the operator regulator and community and encompasses closure planning design implementation and monitoring Written by industry experts and practitioners *Guidelines for Open Pit and Waste Dump Closure* is the sixth in a series of books developed by the Large Open Pit LOP Project Focused on the technical challenges related to geology geotechnical engineering water and geochemistry it covers the key aspects that relate to closure of open pits and waste dumps including planning long term physical and

chemical stability and post mining land use PMLU The book also includes workflows that provide clarity on geotechnical and hydrogeological assessments relating to closure planning definition of pragmatic objectives and measures of success implementation and monitoring for open pits and waste dumps for closure and how these may interact with adjacent land uses Drawing on global lessons learned on mine closure over a period of more than 30 years this comprehensive guide uses industry experience to set out a road map to closure and potentially relinquishment of open pits and waste dumps It will be invaluable for mine closure practitioners corporate planners mine management mining engineers and technical staff mine stakeholders and regulators
