Lucking, Frank A. Maffei, Robert F. Tamburro, Neal J. Thomas, 2012-04-10 This is the first comprehensive study guide covering all aspects of pediatric critical care medicine It fills a void that exists in learning resources currently available to pediatric critical care practitioners The major textbooks are excellent references but do not allow concise reading on specific topics and are not intended to act as both text and study guide There are also several handbooks available but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner **Cardiac Rehabilitation Manual** Josef Niebauer, 2017-02-13 This book fulfills the need for practical guidance among all professionals involved in the management of these patients from residents and fellows of cardiology and internal medicine surgical teams physiotherapy professionals critical care physicians and family medicine practitioners The thoroughly updated content takes into account recent developments in cardiac rehabilitation and incorporates practical advice on how to use guidelines in clinical practice There will be one new chapter on patients with cardiac resynchronization therapy and all the others will be updated to keep up to date with the guidelines and current practice Cardiac rehabilitation is of key importance to ameliorate long term morbidity and mortality resulting from cardiac diseases and events However much of the current literature is dense unwelcoming and academic in style and format For those physicians understanding the scope of cardiac rehabilitation there is a need to distill the guidelines and various management options available to them into a concise practical manual Up until now all references have looked at the general options but there is definite need to investigate the practicalities of individual patient groups
