307 20 Hdi Problems:

Multilevel Modeling of Social Problems Robert B. Smith, 2011-02-26 Uniquely focusing on intersections of social problems multilevel statistical modeling and causality the substantively and methodologically integrated chapters of this book clarify basic strategies for developing and testing multilevel linear models MLMs and drawing casual inferences from such models These models are also referred to as hierarchical linear models HLMs or mixed models The statistical modeling of multilevel data structures enables researchers to combine contextual and longitudinal analyses appropriately But researchers working on social problems seldom apply these methods even though the topics they are studying and the empirical data call for their use By applying multilevel modeling to hierarchical data structures this book illustrates how the use of these methods can facilitate social problems research and the formulation of social policies It gives the reader access to working data sets computer code and analytic techniques while at the same time carefully discussing issues of causality in such models This book innovatively Develops procedures for studying social economic and human development Uses typologies to group i e classify or nest the level of random macro level factors Estimates models with Poisson binomial and Gaussian end points using SAS s generalized linear mixed models GLIMMIX procedure Selects appropriate covariance structures for generalized linear mixed models Applies difference in differences study designs in the multilevel modeling of intervention studies Calculates propensity scores by applying Firth logistic regression to Goldberger corrected data Uses the Kenward Rogers correction in mixed models of repeated measures Explicates differences between associational and causal analysis of multilevel models Consolidates research findings via meta analysis and methodological critique Develops criteria for assessing a study s validity and zone of causality Because of its social problems focus clarity of exposition and use of state of the art procedures policy researchers methodologists and applied statisticians in the social sciences specifically sociology social psychology political science education and public health will find this book of great interest It can be used as a primary text in courses on multilevel modeling or as a primer for more advanced texts The Matrix Eigenvalue Problem David S.

Watkins, 2007-01-01 The first in depth complete and unified theoretical discussion of the two most important classes of algorithms for solving matrix eigenvalue problems QR like algorithms for dense problems and Krylov subspace methods for sparse problems The author discusses the theory of the generic GR algorithm including special cases for example QR SR HR and the development of Krylov subspace methods This book also addresses a generic Krylov process and the Arnoldi and various Lanczos algorithms which are obtained as special cases Theoretical and computational exercises guide students step by step to the results Downloadable MATLAB programs compiled by the author are available on a supplementary Web site Readers of this book are expected to be familiar with the basic ideas of linear algebra and to have had some experience with matrix computations Ideal for graduate students or as a reference book for researchers and users of eigenvalue codes
