Srinivasulu Reddy,Dr. Nasim Ali Khan,Dr. M.S. Priyadarshini,Mr. D Venkatabramhanaidu,2024-11-06 This Book Entitled Power System I has been written in accordance with the latest syllabus prescribed by JNT University Ananthapur Regulation 2023 This book comprises of many general information about various power generation conservation Substation Distribution s systems UG cables Economic aspects with Tariff Owing to the benefit of the students from the exam point of view University questions are specified under each topic Two mark questions with answers are included at the end of each unit With these features we sincerely hope that this book would serve as a valuable text for the students *Energy Harvesting* Deepti Agarwal,Kimmi Verma,Shabana Urooj,2022-09-28 Energy Harvesting Enabling IoT Transformations gives insight into the emergence of energy harvesting technology and its integration with IoT based applications The book educates the reader on how energy is harvested from different sources increasing the effectiveness efficiency and lifetime of IoT devices Discusses the technology and practices involved in energy harvesting for biomedical agriculture and automobile industries Compares the performance of IoT based devices with and without energy harvesting for different applications Studies the challenges and issues in the implementation of EH IoT Includes case studies on energy harvesting approach for solar thermal and RF sources Analyzes the market and business opportunities for entrepreneurs in the field of EH IoT This book is primarily aimed at graduates and research scholars in wireless sensor networks Scientists and R D workers in industry will also find this book useful **Electrician (Theory) - II** Mr. Rohit Manglik,2024-05-18 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels

Sustainable Power Systems Nava Raj Karki,Rajesh Karki,Ajit Kumar Verma,Jaeseok Choi,2017-01-10 This book deals with quantifying and analyzing the risks associated with sustainable energy technology growth in electric power systems and developing appropriate models and methodologies to mitigate the risks and improve the overall system performance The rapid increase in the installation of renewable energy sources in electric power systems has given rise to a wide range of problems related to planning and operation of power systems to maintain quality stability reliability and efficiency Additionally there is a growing global environmental concern regarding increasing emissions from the electric power generation required to meet rising energy needs and support sustainable and inclusive development The phenomenon of low

voltage ride through LVRT common to wind energy systems is discussed and ways to tackle the same are proposed in the first chapter Subsequent chapters propose methods of optimizing a sustainable and smart microgrid and supplying electricity to remote areas of a developing country with no immediate possibility of national grid extension The economic benefit and technical challenges of forming localized minigrid are also discussed The book proposes a method for reliability assessment of a power grid with sustainable power transportation system The issue of weak link in power system is very important as it will provide the system operators and planners to take necessary measures to strengthen the system An approach to determine the weak parts of the system and its unreliability is proposed With increasing installation of HVDC power transmission and development of efficient and low cost power electronic devices the DC microgrids are becoming a common phenomenon Their existence together with AC Grids result in Hybrid AC DC Microgrids which are discussed in this book It further presents a method for reliability evaluation of a distribution system with network reconfiguration in the presence of distributed generation The important problems in sustainable energy growth and their potential solutions discussed and presented in the book should be of great interest to engineers policy makers researchers and academics in the area of electric power engineering New Frontiers in Cloud Computing and Internet of Things Rajkumar Buyya,Lalit

Garg,Giancarlo Fortino,Sanjay Misra,2022-09-26 This book provides an account of the latest developments in IoT and cloud computing and their practical applications in various industrial scientific business education and government domains The book covers the advanced research and state of the art review of the latest developments in IoT and cloud computing and how they might be employed post COVID era The book also identifies challenges and their solutions in this era shaping the direction for future research and offering emerging topics to investigate further The book serves as a reference for a broader audience such as researchers application designers solution architects teachers graduate students enthusiasts practitioners IT managers decision makers and policymakers The book editors are pioneers in the fields of IoT and Cloud computing Provides an account of the latest developments in IoT and cloud computing and how it can aid in a COVID 19 Era in a variety of applications Identifies IoT and cloud computing challenges and their solutions shaping the direction for future research Serves as a reference for researchers application designers solution architects teachers and graduate students **Power**
