

3.4 Cycles of Matter

Lesson Objectives

-  Describe how matter cycles among the living and nonliving parts of an ecosystem.
-  Describe how water cycles through the biosphere.
-  Explain why nutrients are important in living systems.
-  Describe how the availability of nutrients affects the productivity of ecosystems.

Lesson Summary

Recycling in the Biosphere Matter, unlike energy, is recycled within and between ecosystems. Elements pass from one organism to another and from one part of the biosphere to another through **biogeochemical cycles**, which are closed loops powered by the flow of energy.

The Water Cycle Water moves between the ocean, the atmosphere, and land.

- ▶ Evaporation is the process in which water changes from a liquid to a gas.
- ▶ Transpiration is the process in which water evaporates from the leaves of plants.

Nutrient Cycles The chemical substances that an organism needs to survive are called **nutrients**. Like water, nutrients pass through organisms and the environment.

- ▶ **Carbon Cycle:** Carbon is a key ingredient of all organic compounds. Processes involved in the carbon cycle include photosynthesis and human activities such as burning.
- ▶ **Nitrogen Cycle:** Nitrogen is needed by all organisms to build proteins. Processes involved in the nitrogen cycle include nitrogen fixation and denitrification.
 - ∞ In **nitrogen fixation**, certain bacteria convert nitrogen gas into ammonia.
 - ∞ In **denitrification**, other soil bacteria convert nitrogen compounds called nitrates back into nitrogen gas.
- ▶ **Phosphorus Cycle:** Phosphorus is needed for molecules such as DNA and RNA. Most of the phosphorus in the biosphere is stored in rocks and ocean sediments. Stored phosphorus is gradually released into water and soil, where it is used by organisms.

Nutrient Limitation A nutrient that, in short supply, can limit the productivity of an ecosystem is called a **limiting nutrient**.

Answers to Your Biggest Questions About Teaching Secondary Science Karen Mesmer,Enya Granados,Kevin Gant,Laura Shafer,Ayanna D. Perry,2024-01-25 Your guide to grow and flourish as a science teacher The past two decades have seen a paradigm shift in science education thanks in large part to the Next Generation Science Standards NGSS which advocate a move away from procedural lab investigations and direct instruction and toward increased emphasis on reasoning sensemaking phenomena exploration problem solving and collaboration Under this new paradigm students are learning real science as scientists practice it so that more and more students are actively investigating questions and pursuing solutions of their own making As part of the Five to Thrive series for early career educators this comprehensive guide provides those who are new to teaching science as well as seasoned teachers looking to enhance their practice the fundamentals to develop best teaching practices that reflect their students experiences and requirements Written by experienced science educators **Answers to Your Biggest Questions About Teaching Secondary Science** provides practical guidance on successful strategies and techniques for teaching science in a way that gives every student the opportunity to learn grow and achieve at high levels while providing opportunities to develop their agency and authority in the classroom ultimately resulting in a positive science identity The book is organized around five overarching questions and answers that will help you most thrive in your secondary science classroom How do I build a positive science community How do I structure organize and manage my science class How do I engage my students in science How do I help my students talk about science How do I know what my students know and how can I use that information to plan and move them forward The book concludes with a sixth question Where do I go from here that provides guidance for growing your practice over time including discussions on self care advocating for students and an extensive discussion on growing your professional network Woven throughout you ll find helpful sidebar notes on fostering identity and agency access and equity teaching in different settings and invaluable resources for deeper learning Strive to become the best science educator you can be your students are counting on it

The Art and Science of Grazing Sarah Flack,2016 Grazing management might seem simple just put livestock in a pasture and let them eat their fill However as Sarah Flack explains in **The Art and Science of Grazing** the pasture livestock relationship is incredibly complex If a farmer doesn t pay close attention to how the animals are grazing the resulting poorly managed grazing system can be harmful to the health of the livestock pasture plants and soils Well managed pastures can instead create healthier animals a diverse and resilient pasture ecosystem and other benefits Flack delves deeply below the surface of let the cows eat grass demonstrating that grazing management is a sophisticated science that requires mastery of plant and animal physiology animal behavior and ecology She also shows readers that applying grazing management science on a working farm is an art form that calls on grass farmers to be careful observers excellent planners and record keepers

skillful interpreters of their observations and creative troubleshooters The Art and Science of Grazing will allow farmers to gain a solid understanding of the key principles of grazing management so they can both design and manage successful grazing systems The book s unique approach presents information first from the perspective of pasture plants and then from the livestock perspective helping farmers understand both plant and animal needs before setting up a grazing system This book is an essential guide for ruminant farmers who want to be able to create grazing systems that meet the needs of their livestock pasture plants soils and the larger ecosystem The book discusses all the practical details that are critical for sustained success how to set up a new system or improve existing systems acreage calculations paddock layout fence and drinking water access lanes and other grazing infrastructure managing livestock movement and flow soil fertility seeding and reseeding pastures and more The author includes descriptions of real grazing systems working well on dairy beef goat and sheep farms in different regions of North America The book covers pasture requirements specific to organic farming but will be of use to both organic and non organic farms
