Modeling of coal gasification for fuel cell utilization M. L. Finson, United States. Department of Energy. Division of Fossil Fuel Utilization, 1978 This report summarizes recent progress on a DOE supported program to construct computer models for potential future combined coal gasification fuel cell power generation systems The approach is to develop physically well founded descriptions for the performance of both molten carbonate fuel cells and coal gasifiers and to utilize the models to prepare performance maps for each device enabling selection of the optimum interfaces between fuel cells and gasifiers In a previous phase of the study we identified entrained flow gasification as the most appropriate type for providing fuel cell feed gas on the basis of off gas composition and the ability to handle a wide range of coal types Accordingly a substantial portion of the current effort is concerned with the development of a computer model for entrained flow gasifiers Furthermore several scaling laws have been developed for fuel cell performance Mostly based on equilibrium open circuit considerations to date these address such issues as the requirements for avoiding carbon deposition the potential effects of methane conversion and the distribution of heat sources and sinks within the cell

Fuel Cell Hybrid EVs Ronald K Jurgens, 2010-11-29 With production and planning for new electric vehicles gaining momentum worldwide this book the fifth in a series of five volumes on this subject provides engineers and researchers with perspectives on the most current and innovative developments regarding electric and hybrid electric vehicle technology design considerations and components This book features 14 SAE technical papers published from 2008 through 2010 that look at innovative engineering approaches to meeting the major technological challenges associated with fuel cells Topics covered include Advances in powertrain systems for fuel cell vehicles Diagnostic design processes for developmental vehicles Application of two fuel cells in hybrid electric vehicles Research and design of a centrifugal compressor for fuel cell turbocharger The future of fuel cell hybrid EVs
