variety of solutions produced reflects the different aspirations and needs of the people they are designing for The chapters cover user needs and transport design and the transport system transport design case studies and the case for the automobile A conclusion briefly signals what the future for transport design might be Lavishly illustrated throughout in four colour Design for Transport is an imaginative and rigorous guide to how designers can take a user centred and socially responsible approach to tackling a range of types of transport from systems to products and from bicycles to automobiles demonstrating a rich array of solutions through case studies Success and failure in the UK car manufacturing industry Great Britain: Parliament: House of Commons: Trade and Industry Committee,2007-03-29 Although initially sparked by the collapse of MG Rover this inquiry into the UK automotive industry was broadened to examine the following subjects the principal reasons for the different records of success by different companies how companies arrive at investment and closure decisions the role played by trade unions the appropriate Government response to closure announcements and what the Government could do to help the supply chain and workforce if plants are closed Overall it foresees mixed prospects for car manufacturing in this country and thinks it is important that the industry and Government put extra effort into improving skills increasing R D adopting lean manufacturing techniques and strengthening the local supply chain
