inclusion into core and emergent common ground **Martial Arts as Embodied Knowledge** D. S. Farrer, John Whalen-Bridge, 2011-12-01 This landmark work provides a wide ranging scholarly consideration of the traditional Asian martial arts Most of the contributors to the volume are practitioners of the martial arts and all are keenly aware that these traditions now exist in a transnational context The book s cutting edge research includes ethnography and approaches from film literature performance and theater studies Three central aspects emerge from this book martial arts as embodied fantasy as a culturally embedded form of self cultivation and as a continuous process of identity formation Contributors explore several popular and highbrow cultural considerations including the career of Bruce Lee Chinese wuxia films and Don DeLillo s novel Running Dog Ethnographies explored describe how the social body trains in martial arts and how martial arts are constructed in transnational training Ultimately this academic study of martial arts offers a focal point for new understandings of cultural and social beliefs and of practice and agency Jujutsu and Judo in the West Michael DeMarco, 2018-04-24 The late 19th century saw a dynamic growth of contacts between Western countries and the Far East Along with the increase in travel came a wave of educational opportunities for Americans and Europeans to gain first hand experience of living in countries such as China India and Japan Likewise adventurous individuals from the Orient made their way to the West Scholars politicians and business people became experts in their adapted culture Some learned the native language and became experts in their second culture often writing and lecturing on a variety of topics including martial traditions By the early 20th century a number of Japanese jujutsu and judo instructors were teaching their exotic arts in Germany Spain the United Kingdom and the United States How were these instructors viewed by those in their host countries What similarities and differences were seen between the Japanese combatives and the local traditions such as Catch as Catch Can Greco Roman and Pancrase wrestling and styles of boxing Chapters in this anthology present an excellent overview of the early days when jujutsu and judo took foothold in the USA and Europe with particular emphasis on England and the influence of The Budokwai in London which as noted on Wikipedia is the oldest Japanese martial arts club in Europe It was founded in 1918 by Gunji Koizumi and initially offered tuition in jujutsu kendo and other Japanese arts It was the first judo club in Europe This anthology offers a historical view of how and why jujutsu and judo became living traditions in the West and developed over the decades There are six technical chapters by David Finch well known for his knowledge of judo and famed for his professional photography The last chapter is a fitting finale presenting a comprehensive history and technical description of The Budokwai Kime no kata a judo kata created during the earlier period of the institute The fourteen chapters in this anthology most from the Journal of Asian Martial Arts and a few newer writings also discuss many of the leading practitioners of jujutsu judo As these arts adapted and transformed to Western countries the purpose and modes of practice have also changed This is important for all to study since knowledge of the past is vital for how these forms of combat and sport will evolve in the future **Expanding the Science of Compassion** Myriam Mongrain, Dacher

Keltner, James Kirby, 2021-11-01 **Becoming Batman** E. Paul Zehr, 2008-11-28 Battling bad guys High tech hideouts The gratitude of the masses Who at some point in their life hasn't dreamed of being a superhero Impossible right Or is it Possessing no supernatural powers Batman is the most realistic of all the superheroes His feats are achieved through rigorous training and mental discipline and with the aid of fantastic gadgets Drawing on his training as a neuroscientist kinesiologist and martial artist E Paul Zehr explores the question Could a mortal ever become Batman Zehr discusses the physical training necessary to maintain bad guy fighting readiness while relating the science underlying this process from strength conditioning to the cognitive changes a person would endure in undertaking such a regimen In probing what a real life Batman could achieve Zehr considers the level of punishment a consummately fit and trained person could handle how hard and fast such a person could punch and kick and the number of adversaries that individual could dispatch He also tells us what it would be like to fight while wearing a batsuit and the amount of food we'd need to consume each day to maintain vigilance as Gotham City's guardian A fun foray of escapism grounded in sound science *Becoming Batman* provides the background for attaining the realizable though extreme level of human performance that would allow you to be a superhero
