System-Ergonomic Design of Cognitive Automation Reiner Onken,Axel Schulte,2010-02-23 This timely book comes amid rapid advances in the field It gives system designers more guidelines about designing work systems and associated machines effectively and in particular those related to guidance and control of manned and unmanned vehicles

AI Governance Handbook Sunil Gregory,Anindya Sircar,2025-09-15 Enterprise AI represents a transformative moment in technology empowering businesses to unlock the potential of data automation and advanced analytics It drives innovation streamlines operations and amplifies competitiveness in an increasingly digital economy Yet as promising as this technology

is adopting Enterprise AI is no simple feat. It demands a strategic alignment of AI initiatives with organizational goals while addressing many complex risks and challenges. Businesses face a new frontier of operational dilemmas from algorithmic bias and data privacy concerns to the legal and ethical quandaries of AI-generated content. Questions of accountability for AI actions, intellectual property rights, and the threat of data laundering or AI hallucinations further complicate the landscape. Amid these challenges, enterprises are tasked with navigating a pre-regulatory era where global authorities are racing to establish policies and frameworks for a trustworthy and lawful AI ecosystem. The AI Governance Handbook is a comprehensive guide tailored for stakeholders at the forefront of AI adoption: executives, managers, data scientists, engineers, and compliance professionals. This essential resource provides the knowledge, tools, and strategies to lead organizations through the complexities of implementing AI responsibly and effectively. Packed with actionable insights, the handbook explores critical topics such as aligning AI strategies with organizational objectives, managing ethical dilemmas, adhering to emerging regulations, and fostering transparency in AI operations. It offers readers a roadmap to build a resilient and dependable AI framework, prioritizing fairness, accountability, and innovation.

Verification and Validation of Complex Systems: Human Factors Issues John A. Wise, V. David Hopkin, Paul Stager, 2013-06-29. Despite its increasing importance, the verification and validation of the human-machine interface is perhaps the most overlooked aspect of system development. Although much has been written about the design and development process, very little organized information is available on how to verify and validate highly complex and highly coupled dynamic systems. Inability to evaluate such systems adequately may become the limiting factor in our ability to employ systems that our technology and knowledge allow us to design. This volume, based on a NATO Advanced Science Institute held in 1992, is designed to provide guidance for the verification and validation of all highly complex and coupled systems. Air traffic control is used as an example to ensure that the theory is described in terms that will allow its implementation, but the results can be applied to all complex and coupled systems. The volume presents the knowledge and theory in a format that will allow readers from a wide variety of backgrounds to apply it to the systems for which they are responsible. The emphasis is on domains where significant advances have been made in the methods of identifying potential problems and in new testing methods and tools. Also emphasized are techniques to identify the assumptions on which a system is built and to spot their weaknesses.

Generative Systems and Intelligent Tutoring Systems Sabine Graf, Angelos Markos, 2025-07-28. This book constitutes the refereed proceedings of the 21st International Conference on Intelligent Tutoring Systems (ITS 2025) held in Alexandroupolis, Greece, during June 2-6, 2025. The 21 full papers, 27 short papers, and 5 posters included in this book were carefully reviewed and selected from 67 submissions. The papers are organized in the following topical conference tracks: Part I: Generative Tutoring Systems. The goal of this part is to show how new techniques inspired by artificial intelligence (AI) and new methods in education can improve learning, teaching, and generate the capacity for knowledge acquisition and much more. Part II: Application areas, environments, and techniques for AI.

systems This part shows the progress of research investigating the different application areas such as education health techniques such as neural networks data mining natural language processing and environments such as games virtual reality cognitive robots for effective AI systems **Modelling and Simulation for Autonomous Systems** Jan

Hodicky,2015-08-08 This book constitutes the thoroughly refereed post workshop proceedings of the Second International Workshop on Modelling and Simulation for Autonomous Systems MESAS 2015 held in Prague Czech Republic in April 2015 The 18 revised full papers included in the volume were carefully reviewed and selected from 33 submissions They are organized in the following topical sections state of the art and future of AS MS experimental frameworks for AS methods and algorithms for AS **Handbook of Cognitive and Autonomous Systems for Fire Resilient Infrastructures** MZ

Naser,Glenn Corbett,2022-06-27 This handbook aims at modernizing the current state of civil engineering and firefighting especially in this era where infrastructures are reaching new heights serving diverse populations and being challenged by unique threats Its aim is to set the stage toward realizing contemporary smart and resilient infrastructure The Handbook of Cognitive and Autonomous Systems for Fire Resilient Infrastructures draws convergence between civil engineering and firefighting to the modern realm of interdisciplinary sciences i e artificial intelligence IoT robotics sensing and human psychology As such this work aims to revolutionize the current philosophy of design for one of the most notorious extreme events fire Unlike other publications which are narrowed to one specific research area this handbook cultivates a paradigm in which critical aspects of structural design technology and human behavior are studied and examined through chapters written by leaders in their fields This handbook can also serve as a textbook for graduate and senior undergraduate students in Civil Mechanical and Fire Protection engineering programs as well as for students in Architectural and social science disciplines Students engineers academics professionals scientists firefighters and government officials involved in national and international societies such as the American Society of Civil Engineers ASCE Society of Fire Protection Engineers SFPE National Fire Protection Association NFPA and Institute of Electrical and Electronics Engineers IEEE among others will benefit from this handbook **Novel and Intelligent Digital Systems: Proceedings of the 4th International**

Conference (NiDS 2024) Phivos Mylonas,Dimitris Kardaras,Jaime Caro,2024-10-15 This book compiles the research findings presented at the 4th International Conference on Novel Intelligent Digital Systems NiDS 2024 which took place in Athens Greece on September 25 27 2024 hosted by the University of West Attica NiDS 2024 was conducted in a hybrid format offering participants the flexibility to join either online or in person The conference highlighted the latest innovations in intelligent systems and emphasized the collaborative research that advances Artificial Intelligence AI in software development It served as a platform for high quality research providing a space to explore challenges and innovations in AI NiDS 2024 referred to experts researchers and scholars in artificial and computational intelligence as well as the broader field of computer science offering insights into interconnected and complementary areas By promoting the exchange of ideas

the conference aimed to strengthen and expand the network of researchers academics and industry professionals
