Aircraft Repair Manual

Aircraft Repair Manual:

Technical Manual Naval Air Systems Command, 2018-10-19 Technical Order TO 1 1A 1 is one of a series of manuals prepared to assist personnel engaged in the general maintenance and repair of military aircraft. This manual covers general aircraft structural repair. This is a Joint Service manual and some information may be directed at one branch of the service and not the other. Wherever the text of the manual refers to Air Force technical orders for supportive information, refer to the comparable Navy documents. See Table 1. The satisfactory performance of aircraft requires continuous attention to maintenance and repair to maintain aircraft structural integrity. Improper maintenance and repair techniques can pose an immediate and potential danger. The reliability of aircraft depends on the quality of the design as well as the workmanship used in making the repairs. It is important that maintenance and repair operations be made according to the best available techniques to eliminate or at least minimize possible failures.

Introduction to Maintenance Repair and Overhaul of Aircraft Engines and Components

brings together the basic aspects of a fundamentally important part of the aerospace industry, the one that supports the

global technical efforts to keep passenger and cargo planes flying reliably and safely. Over time, aircraft components and

structural parts are subject to environmental effects such as corrosion and other types of material deterioration, wear and

fatigue. Such parts could fail in service and affect the safe operation of the aircraft if the degradation were not detected and

addressed in time. Regular planned maintenance supports the current and future value of the aircraft by minimizing the

physical decline of the aircraft and engines throughout its life.

Introduction to Maintenance Repair and Overhaul of Aircraft Engines and Components was written by the industry veteran Shevantha K. Weerasekera, an aerospace engineer with 20

years of aircraft maintenance experience who currently leads the engineering team of a major technical enterprise in the

field.
