

Air Force Waiver Guide

"The Aerospace Medicine Waiver Guide provides guidance for waivers relating to flying class and special duty personnel medical standards. The Aerospace Medicine Waiver Guide does not cover issues relating to general military accession or retention standards."

Last Update: 02 Dec 2020

Aircrew Waiver Guide Usaf 2012

**David P. Gradwell, Elizabeth S.
Wilkinson**

Aircrew Waiver Guide Usaf 2012:

Aeromedical Psychology Carrie H. Kennedy, Gary G. Kay, 2017-11-01 Aeromedical psychology is that branch of psychology pertaining to the assessment selection and evaluation of aviation personnel This book Aeromedical Psychology is designed to provide the means for a variety of clinicians to carry out sound assessment and selection procedures perform informed evaluations and make subsequent recommendations regarding flight status and treatment strategies geared to the aviation environment To facilitate a dynamic understanding of the field the book emphasizes an integration of applications and theory case examples and research The book is divided into three parts The first presents assessment and selection procedures for aviation personnel i e air traffic controllers flight officers and pilots and astronauts and the many ways in which both psychologists and psychiatrists are involved in these roles In the second part the waiver standards put forth by both the FAA and the various branches of the military are presented as well as the waiver decision process Clinical issues unique to aviation notably fear of flying motivation to fly and airsickness are addressed as well as possible courses of intervention treatment and disposition In the final part more specialized issues pertaining to aeromedical psychology are dealt with namely the psychopharmacological research and regulations applicable to recreational pilots and aviation personnel managing the aftermath of aviation mishaps and the psychologist s role in accident investigations

Handbook of Aviation Neuropsychology Robert Bor, Carina Eriksen, Randy J. Georgemiller, Alastair L. Gray, 2024-11-11 The field of aviation neuropsychology helps us to understand and improve human performance and safety in the aerospace industry both for the estimated 300 000 commercial pilots and the 4 5 billion passengers they transport every year This handbook brings together a group of internationally renown academic and industry experts to provide a comprehensive overview of the background goals principles challenges and associated practice skills and research themes of aviation neuropsychology After an introduction to the history and development of aviation psychology additional sections focus on the importance of prevention and resilience to enhance airline workers cognitive and mental functioning to reduce the risk of human errors and accidents as well as the different aspects of assessment including pilot medical certification neuropsychological testing and cultural considerations Additional chapters explore how we can learn from past errors and build on existing strengths Finally special aspects are examined including the role of different common conditions e g neurological and psychological disorders and report writing in aviation Readers will find the book full of unique insights theory and research giving them a comprehensive overview of the field While the book is designed primarily for health care professionals neuropsychologists clinical psychologists aviation psychologists aviation medical examiners neurologists and flight safety specialists it will be of interest to other professionals inside and outside of aviation including professionals in other safety critical settings or researchers looking to improve safety in the aviation industry

Ernsting's Aviation and Space Medicine David P. Gradwell, Elizabeth S. Wilkinson, 2025-05-30 Ernsting s Aviation and Space Medicine applies current understanding in

medicine physiology and the behavioural sciences to the medical challenges and stresses that are faced by both civil and military aircrew and their passengers on a daily basis The sixth edition of this established textbook and clinical reference has been revised and updated by a multidisciplinary team of experienced contributors many new to this edition The structure of the book has been refined bringing related chapters together where appropriate while the clinical content has been carefully streamlined in line with the specific requirements of the aviation medicine practitioner and adviser with new chapters added on Commercial Space Travel Skin Disease and Women s Health Key Features Convenient embraces all aspects of aviation medicine in a single volume divided into four parts for ease of reference Aviation Physiology Aircrew Systems Space Physiology Medicine Clinical Aviation Medicine and Operational Aviation Medicine Comprehensive covers all forms of military and passenger carrying aircraft including issues surrounding passenger safety and transport of the sick and injured Aids detailed understanding focuses on the principles underlying the standards in the field rather than just the standards themselves Applicable worldwide addresses international issues including worldwide regulation of medical standards and travel and disease Accessible chapter summaries enable rapid assimilation of key points while key references and suggestions for further reading encourage in depth learning eBook included text fully online and searchable via VitalSource eBook The text remains the recommended coursebook for those studying for the Diploma in Aviation Medicine of the Faculty of Occupational Medicine of the Royal College of Physicians recognized worldwide as an exemplary standard in the field and for similar worldwide qualifications It is an essential companion for all civil and military aviation medicine practitioners both when preparing for professional examinations and in daily practice and for those in the many disciplines of the behavioural and life sciences that include some study of aviation its physiology and related issues It is also recommended reading for those with a wider interest in the medical problems of professional or recreational flying air transport and the aviation industry
