is a health problem of the first magnitude so that this document includes the main issues and changes updating the
guidelines of the American Heart Association AHA for cardiopulmonary resuscitation CPR and Emergency Cardiovascular

Historical Comparison Patrick Kimuyu,2017-12-14 Literature Review from the year 2017 in the subject Medicine Hospital
Environment Clinical Medicine grade 1 Egerton University language English abstract Over the years the American Heart
Association has made outstanding contributions and numerous improvements to cardiopulmonary resuscitation and advanced
cardiac life support guidelines It is due to adequate use of resources and continuous research that millions of lives are saved
in the United States Such guidelines serve health care providers and other members of the healthcare team as a resource to
ensure adequate and timely response to those individuals who experience cardiac or respiratory arrest However according to
AHA statistics More than 326 000 people in the US suffer out of hospital cardiac arrests each year Statistics prove that if
more people knew CPR more lives could be saved American Heart Association 2016 In other words dissemination of
knowledge on the matter has direct outcomes on increasing survival rates Therefore the guidelines and the implementation
methods are on continuous review based on new evidence It is important to provide those who suffer cardiac or respiratory
arrest with timely services because delays could end up affecting the outcome of those who experience reversible damage
Healthcare providers around the world have become informed on the benefits of updated competence and direct patient
outcomes and quality of care The American Heart Association has published the new 2015 cardiopulmonary resuscitation
guidelines where changes and updates are reflected in an effort to put the best available evidence in practice The purpose of
this review is to compare the 2015 AHA updates with historical evidence in an attempt to explicate the implications and
limitations of pharmacology in advanced cardiac life support **Highlights of the 2015 American Heart Association**
