ECAM

The ECAM (Electronic Centralized Aircraft Monitoring) system is made up of two primary components, two SDAC's (System Data Acquisition Concentrators) and two FWC's (Flight Warning Computers). A loss of only one SDAC or only one FWC will not result in any loss of function. The second computer can handle all functions alone. The SDAC's receive data from sensors and will send signals to 3 DMC's (Display Management Computer) which generate the screen image. The SDAC's also send signals to the FWC. The FWC will generate various warning/caution messages.

The E/WD (Engine/Warning Display) is the display that shows normal engine readings and ECAM messages. The SD (System Display) is directly below the E/WD and normally shows system pages or status. For information on switching screens in case of failures see EFIS later in this section.

ECAM uses color to indicate the importance of the indication--

RED:	Immediate action required
ORANGE (AMBER):	Awareness but no action required
GREEN:	Normal operation
WHITE:	Titles and remarks
BLUE (CYAN):	Actions to be carried out or limitations
PURPLE (MAGENTA):	Special messages (i.e. inhibition messages)

Note: pulsing green or amber indications are approaching limits

If a FWC fails the Master Caution and Master Warning lights will indicate the failure (along with a warning from ECAM) by the upper or lower light in both the Master Caution and Warning light being out. If the #1 FWC fails then the captain's upper lights would be out and the F/O's lower lights would be out. If #2 FWC fails the reverse lights will go out.

Loss of both FWC's will result in a loss of most warning capability. The dual failure of the FWC's will result in an amber caution with no sound.

ECAM system pages are controlled through the ECAM control panel. Captains will be using the mnemonic FUEL to check systems prior to departure.

F FUEL, balance, configuration, quantity
H HYD, Hydraulics quantity (painters in boxes)
E ENG, Engine oil quantity (min. 12.5 gals.)
D DOOR/OXY, Doors armed, O2 pressure (note: overwing slides always armed)

Note: Press FUEL, HYD, ENG and then press ENG again to return to default DOOR/OXY page.
