Jet Engine Turbines Facundo Conforti, The transition from piston engines to jet engines is often a significant milestone in every pilot's career. Turbines or jet engines offer different performance characteristics compared to piston engines. Not only do turbines deliver superior power but they also enable flight at much higher altitudes than piston engines. In this work you will learn all the basic operating principles of a turbine along with the main components that make up these types of engines and a step by step guide on transitioning from one engine type to another.

Multi-Engine Facundo Conforti, The transition from a single engine aircraft to a multi engine aircraft can be either simple or complex depending on how the foundational concepts of a new flight methodology are learned. A twin engine aircraft is identical to a single engine aircraft with some additional operational considerations in both normal and abnormal operations. In this work we will learn all these special considerations allowing you to begin operating a multi engine aircraft safely and efficiently. A work dedicated to the transition that every pilot must go through to become a top level aviation professional.
