

Airline Reservation System

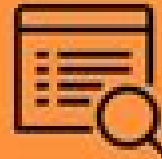

1 Post booking management

2 Payment options

3 Cloud

The airline reservation system is a web-based booking solution that helps in consolidating data from all airlines through the use of global distribution systems. The system provides inventory and rates in real time to customers as well as travel agents.

Also used to assist with different airline management tasks and to meet customers' needs from the initial booking all the way to completion of the flight.

Airline reservation system should have multiple options for making payment ranging from credit/debit card, PayPal, mobile wallets among others.
