Answer To Section 3 Imperial China Collapses:

State Power and Governance in Early Imperial China Chun Fung Tong, 2024-09-01 State Power and Governance in Early Imperial China delves into the governance and capacity of the state by providing an empirical historical study of the collapse of China's Qin Empire. In contrast to the popular view that the Qin fell suddenly and dramatically, this book argues that the collapse was rooted in persistent structural problems of the empire, including the serious resource shortages experienced by local governments, inefficient communication between administrative units, and social tensions in the new territories. Rather than reducing Qin rulers to heartless villains who refused to adjust their policies and statecraft, this book focuses on the changes that the regime did make to meet these challenges. It reveals the various measures that Qin rulers devised to solve these problems, even if they were ultimately to no avail. The paradox of the Qin Empire seemed to be that although the regime's policies and reforms could theoretically have strengthened the state's power and improved the governance of the empire, their ramifications simultaneously exacerbated the malfunction of local governments and triggered the military failures that eventually destroyed the empire.

Middle Imperial China, 900-1350 Linda Walton, 2023-08-03 In this highly readable and engaging work, Linda Walton presents a dynamic survey of China's history from the tenth through the mid-fourteenth centuries, from the founding of the Song dynasty through the Mongol conquest when Song China became part of the Mongol Empire and Marco Polo made his famous journey to the court of the Great Khan. Adopting a thematic approach, she highlights the political, social, economic, intellectual, and cultural changes and continuities of the period, often conceptualized as Middle Imperial China. Particular emphasis is given to themes that inform scholarship on world history: religion, the state, the dynamics of empire, the transmission of knowledge, the formation of political elites, gender, and the family. Consistent coverage of peoples beyond the borders—Khitan, Tangut, Jurchen, and Mongol, among others—provides a broader East Asian context and introduces a more nuanced, integrated representation of China's past.

Cities of Jiangnan in Late Imperial China Linda Cooke Johnson, 1993-01-01 This book examines cities of the Jiangnan region of south central China between the twelfth and nineteenth centuries, an area considered to be the model of a successfully developing regional economy. The six studies focus on the urban centers of Suzhou, Hangzhou, Yangzhou, and Shanghai. Emphasizing the regional focus, the authors explore the interconnections and sequential relationships between these major cities and analyze common themes such as the development of handicraft industry, transport, and commerce; class structure; ethnic diversity; and internal immigration, and the social and political pressures generated by developments in manufacturing, taxes, and government politics. The book provides a valuable resource on commercial development and internal economic and social development in pre-modern China, particularly on specific regional development and the historical role of traditional Chinese cities.

Tribute System and Rulership in Late Imperial China Ralph Kauz, Morris Rossabi, 2022-04-11 Demanding and offering tribute is a most common feature in human societies and nothing special to China. In the course of the development of Neolithic and later

societies social classes have developed where persons who achieved superior positions first could demand presents or tribute from neighboring societies they defeated and then with the assistance of sturdy servants from their own people China was certainly no exception to that principle and one of the first terms for tax was thus gong tribute In China s early feudatory social system tribute was demanded from lower political entities and the mutual political relations were already highly developed during the Zhou dynasty 1045-256 BCE This system of inner Chinese relations became a sort of matrix when China expanded and achieved contact with countries which were more or less independent and thus the tribute system evolved The individual case studies in this volume focus on the latest manifestations of the tribute system in late Imperial China *Astral Sciences in Early Imperial China* Daniel Patrick Morgan, 2017-08-03 An innovative history of astronomy in China 221 BCE-750 CE stressing plurality change and the unifying power of myth making *World History: Patterns of Interaction* McDougal-Littell Publishing Staff, 2004-03 *The Military Collapse of China's Ming Dynasty, 1618-44* Kenneth M. Swope, 2014-01-23 This book examines the military collapse of China s Ming Dynasty to a combination of foreign and domestic foes The Ming s defeat was a highly surprising development not least because as recently as in the 1590s the Ming had managed to defeat a Japanese force considered to be perhaps the most formidable of its day when the latter attempted to subjugate Korea en route to a planned invasion of China In contrast to conventional explanations for the Ming s collapse which focus upon political and socio-economic factors this book shows how the military collapse of the Ming state was intimately connected to the deterioration of the personal relationship between the Ming throne and the military establishment that had served as the cornerstone of the Ming military renaissance of the previous decades Moreover it examines the broader process of the militarization of late Ming society as a whole to arrive at an understanding of how a state with such tremendous military resources and potential could be defeated by numerically and technologically inferior foes It concludes with a consideration of the fall of the Ming in light of contemporary conflicts and regime changes around the globe drawing attention to climatological factors and developments outside state control Utilizing recently released archival materials this book adds a much needed piece to the puzzle of the collapse of the Ming Dynasty in China **Forest and Land Management in Imperial China** N. Menzies, 1994-09-01 Although China is generally considered to have suffered continuous deforestation over most of its history forests were protected or even planted and maintained for centuries in some places This study identifies six such cases It uses historical evidence to show that individuals and communities act to manage resources sustainably for a number of reasons including economic benefit religious or symbolic purposes and that sustainability of the management system depends on the form of control exerted over the resource *The Price of Collapse* Timothy Brook, 2026-01-13 How climate change ushered in the collapse of one of history s mighty empires In 1644 after close to three centuries of relative stability and prosperity the Ming dynasty collapsed Many historians attribute its demise to the Manchu invasion of China but the truth is far more profound The Price of Collapse provides an entirely new approach to the

economic and social history of China exploring how global climate crisis spelled the end of Ming rule The mid seventeenth century witnessed the deadliest phase of the Little Ice Age when temperatures and rainfall plunged and world economies buckled Timothy Brook draws on the history of grain prices to paint a gripping portrait of the final tumultuous years of a once great dynasty He explores how global trade networks that increasingly moved silver into China may have affected prices and describes the daily struggle to survive amid grain shortages and famine By the early 1640s as the subjects of the Ming found themselves caught in a deadly combination of cold and drought that defied all attempts to stave off disaster the Ming price regime collapsed and with it the Ming political regime A masterful work of scholarship The Price of Collapse reconstructs the experience of ordinary people under the immense pressure of unaffordable prices as their country slid from prosperity to calamity and shows how the market mediated the relationship between an empire and the climate that turned against it

Beyond Collapse Ronald K. Faulseit,2016 This book interprets how ancient civilizations responded to various stresses including environmental change warfare and the fragmentation of political institutions It focuses on what happened during and after the decline of once powerful regimes and posits that they experienced social resilience and transformation instead of collapse
