Environmental Policy Analyses Peter Knoepfel, 2007-10-05 Having had the opportunity of receiving considerable public money mainly from the Swiss National Science Foundation for numerous environmental policy studies in Switzerland and abroad during the last 25 years I have decided to put the results published mainly in German and French but also in English in many scientific journals monographs and book sections in a single book on behalf of my students younger scholars interested in policy analysis dating from the period of the first environmental policies and my friends teaching this subject in Switzerland and abroad The criteria used to select the fifteen contributions were their impact on the scientific debate at the time of their publication their validity for present conceptualizations of policy analysis in the field of the environment and their contribution to the development of policy analysis as a whole Moreover the selected contributions mainly focus on empirical applications in the field of environmental policies or the interface between environmental and non environmental policies Some have led to concrete policy recommendations of which most have been partly implemented since at least within my own country This research also sometimes addressed regional political administrative arrangements leading to administrative reforms and new strategic directions of implementing agencies **Rediscovering Public Law and Public Administration in Comparative Policy Analysis** Stéphane Nahrath, Frédéric Varone, 2009-01-01 Publié à l'occasion du 60^e anniversaire du Prof Peter Knoepfel Professeur à l'Institut de hautes études en administration publique IDHEAP *Public*

Today new and unexpected challenges arise for Europe's large array of existing dams and fresh perspectives on the development of new projects for supporting Europe's energy transition have emerged. In this context the 12th ICOLD European Club Symposium has been held in September 2023 in Interlaken, Switzerland. The overarching Symposium theme was on the Role of dams and reservoirs in a successful energy transition. The articles collected in this report book, consisting of a 250-page abstract book and a 1010-page full paper USB, cover the various themes developed during the symposium: Dams and reservoirs for hydropower; Dams and reservoirs for climate change adaptation; Impact mitigation of dams and reservoirs; How to deal with ageing dams. In conjunction with the Symposium, the 75th anniversary of the Swiss Committee on Dams offered an excellent opportunity to not only draw from the retrospective of Switzerland's extensive history of dam development but to also reveal perspectives on the new role of dams for a reliable and affordable energy transition. These aspects are illustrated by several articles covering the various activities, challenges, and concerns of the dam community. **Éléments pour une histoire des villes nouvelles** Loïc Vadelorge, 2005
