- 1. Chemical level - study of the chemical composition of the body
- 2. Cellular level - study of the structure and function of cells
- 3. Tissue level - study of the structure and function of tissues
- 4. Organ level - study of the structure and function of organs
- 5. System level - study of the structure and function of body systems
- 6. Organism level - study of the structure and function of the whole body

CELLS AND TISSUES

Cells are the basic units of structure and function of the body

Composition of cellular fluids

Cells are composed of various fluids

Extracellular fluid - fluid outside the cell

Intracellular fluid - fluid inside the cell

Interstitial fluid - fluid between cells

Blood plasma - fluid part of blood

Organic fluids - fluids containing organic molecules

Inorganic fluids - fluids containing inorganic molecules

Electrolytes - substances that conduct electricity

Non-electrolytes - substances that do not conduct electricity

Acids - substances that release hydrogen ions

Bases - substances that accept hydrogen ions

pH - measure of acidity or alkalinity

Homeostasis - the body's ability to maintain a stable internal environment

Feedback loops - mechanisms that regulate homeostasis

Positive feedback - amplifies a response

Negative feedback - reduces a response

Set point - the desired value of a variable

Range - the acceptable range of values for a variable

Stimulus - a change in the environment that triggers a response

Receptor - a structure that detects a stimulus

Effector - a structure that responds to a stimulus

Response - the body's reaction to a stimulus

Adaptation - a change in the body that improves its ability to survive in its environment

Evolution - the process of change in the characteristics of a population over time

Speciation - the process of forming new species

Geography - the study of the Earth's physical features

Climate - the average weather conditions in a particular area

Weather - the state of the atmosphere at a particular time and place

Atmosphere - the layer of gases surrounding the Earth

Hydrosphere - the part of the Earth that is covered by water

Lithosphere - the part of the Earth that is made of rock and soil

Biosphere - the part of the Earth that is inhabited by life

Geosphere - the part of the Earth that is made of rock and soil

Chemosphere - the part of the Earth that is made of chemicals

Anthroposphere - the part of the Earth that is made by humans

Technosphere - the part of the Earth that is made by technology

Infosphere - the part of the Earth that is made by information

Energy - the ability to do work

Power - the rate at which work is done

Work - the transfer of energy from one form to another

Force - a push or pull on an object

Pressure - the force exerted per unit area

Volume - the amount of space an object occupies

Mass - the amount of matter in an object

Weight - the force of gravity on an object

Acceleration - the rate of change of velocity

Velocity - the rate of change of position

Displacement - the change in position of an object

Woman's College. Library, 1923 **The Hippocampus** Robert Isaacson, 2012-12-06 These books are the result of a conviction held by the editors authors and publisher that the time is appropriate for assembling in one place information about functions of the hippocampus derived from many varied lines of research Because of the explosion of research into the anatomy physiology chemistry and behavioral aspects of the hippocampus some means of synthesis of the results from these lines of research was called for We first thought of a conference In fact officials in the National Institute of Mental Health suggested we organize such a conference on the hippocampus but after a few tentative steps in this direction interest at the federal level waned probably due to the decreases in federal support for research in the basic health sciences so keenly felt in recent years However the editors also had come to the view that conferences are mainly valuable to the participants The broad range of students of all ages of brain behavior relations do not profit from conference proceedings unless the proceedings are subsequently published Furthermore conferences dealing with the functional character of organ systems approached from many points of view are most successful after participants have become acquainted with each other's work Therefore we believe that a book is the best format for disseminating information and that its publication can be the stimulus for many future conferences **EMS Respiratory Emergency Management DeMYSTiFieD** Peter A.
