Capra,2013-11-19 Leonardo da Vinci was a brilliant artist scientist engineer mathematician architect inventor and even
musician the archetypal Renaissance man But he was also a profoundly modern man Not only did Leonardo invent the
empirical scientific method over a century before Galileo and Francis Bacon but Capra s decade long study of Leonardo s
fabled notebooks reveals that he was a systems thinker centuries before the term was coined At the very core of Leonardo s
science Capra argues lies his persistent quest for understanding the nature of life His science is a science of living forms of
qualities and patterns radically different from the mechanistic science that emerged 200 years later Because he saw the
world as an integrated whole Leonardo always applied concepts from one area to illuminate problems in another His studies
of the movement of water informed his ideas about how landscapes are shaped how sap rises in plants how air moves over a
bird s wing and how blood flows in the human body His observations of nature enhanced his art his drawings were integral to
his scientific studies and he brought art science and technology together in his beautiful and elegant mechanical and
architectural designs Capra describes seven defining characteristics of Leonardo da Vinci s genius and includes a list of over
forty discoveries he made that weren t rediscovered until centuries later Capra follows the organizational scheme Leonardo
himself intended to use if he ever published his notebooks So in a sense this is Leonardo s science as he himself would have
presented it Obviously we can t all be geniuses on the scale of Leonardo da Vinci But his persistent endeavor to put life at the
very center of his art science and design and his recognition that all natural phenomena are fundamentally interconnected
and interdependent are important lessons we can learn from By exploring the mind of the preeminent Renaissance genius we
can gain profound insights into how to address the complex challenges of the 21st century *Carolina Science and Math*
