about how to approach history taking from patients presenting with a rheumatological problem There will be also a simplified approach to MSK examination of common joints from a rheumatological perspective with the intention to diagnose arthritis and not to be mixed with sports injuries or other soft tissue problems In the last section of the book we will bring the latest classification criteria and the latest recommendation for management guidelines they are so many in one section We are not considering our book as a reference in how to manage patients with RA or SLE by prescribing appropriate drugs We are going only to focus on the approach to the patients and providing the latest guidelines for management available for the reader of the book Jahr's new manual, (or Symptomen-codex.)
