Popular Culture, New Media and Digital Literacy in Early Childhood Jackie Marsh, 2005 This book offers a range of perspectives on children's multimodal experiences, providing a ground-breaking account of the ways in which children engage with popular culture, media, and digital literacy practices from their earliest years. Many young children have extensive experience of film, television, printed media, computer games, mobile phones, and the Internet from birth, yet their reaction to media texts is rarely acknowledged in the national curricula of any country. This seminal text focuses on children from birth to eight years, addressing issues such as media and identity construction, media literacy practices in the home, the changing nature of literacy in technologically advanced societies, the place of popular and media texts in children's lives, and the use of such texts in the curriculum. By exploring children's engagement with popular culture, media, and digital texts in the home, community, and early years settings, the contributors look at empirical studies from around the world and draw out vital new theoretical issues relating to children's emergent techno-literacy practices. With an unmatched team of international experts evaluating topics from text messaging to the Teletubbies, this book is a long-overdue fascinating and illuminating read for policy makers, educational researchers, and practitioners, and crosses over to appeal to those in the linguistics field.
