Luhr, 2003 In the best selling tradition of Smithsonian *Animal* this extraordinary survey of our planet provides unrivaled insight into the forces and processes that formed our environment and which continue to influence its evolution With thousands of breathtaking photographs and unique visual catalogues of the features and phenomena that take place on Earth such as rocks minerals and mountains to tropical rainforests and the different types of clouds *Earth* contains the most up to date ideas on how our world works a compelling review on the health of the planet and unbelievable images of the world's most stunning features *Subject Headings Used in the Dictionary*
